- ▶ Shared Electronic recordkeeping and asset tracking.
- ▶ Coordinated capital project planning
- ▶ Boiler and steam energy audits

Since 1956, Becker Boiler has been Wisconsin’s trusted name in boiler service, repair, and installation. For nearly 70 years, we’ve built our reputation on solving tough problems, responding fast, and doing things right — whether it’s a no-heat emergency or a planned summer replacement.

In December 2024, Becker Boiler entered a new chapter under new ownership. While our values remain the same, we’re investing in the future — expanding our team, upgrading our technology, and improving the systems that allow us to deliver world-class service at every job.

With ASME certifications, detailed documentation, and 12-hour response guarantees, we’re on a mission to be the Midwest’s most trusted boiler specialists.

BECKER'S 12-HOUR GUARANTEE

Call us, and within 12 hours, your system will be running — or you'll have a diagnosis and repair plan. If not, the service call is on us.

Subcontractor for Specialty Boiler Services

Reliable Boiler Support Services for Aging Hot Water
and Steam Systems

Trusted Since 1956 | ASME Certified
All Makes. All Models. All Vintages.

We support mechanical contractors by serving as a trusted specialty subcontractor in boiler and steam applications.

WE FREQUENTLY SUPPORT

- ▶ Mechanical contractors managing large HVAC projects and/or multi-facility maintenance contracts.
- ▶ Firms serving industrial, institutional, and municipal clients—especially in healthcare, higher education, water/wastewater, and manufacturing.
- ▶ Smaller contractors bidding on turnkey HVAC systems that desire specialty boiler expertise.

WHERE WE WORK

Primarily Wisconsin and Northern Illinois, with travel across North America to support key contractor relationships.

HOW WE ADD VALUE

Most mechanical contractors handle new boiler installations in-house. Where Becker adds value is in legacy systems—older, multi-brand, high-pressure, or hard-to-access equipment that requires intensive labor and specialized skills. We help contractors win and deliver large maintenance contracts by handling the boiler scope safely, efficiently, and under their banner—especially when the job involves systems of varying brands, vintages, and conditions.

EMERGENCY BOILER SERVICE

- 1 You call us — we respond immediately, 24/7.
- 2 We stabilize the system and restore heat.
- 3 We create a record of the issue and provide recommendations.
- 4 Ongoing Support - if desired we develop a comprehensive service plan to minimize future emergency events

PLANNED REFURBISHMENT OR UPGRADE

- 1 We perform a walkthrough and evaluate your system.
- 2 We provide a clear quote of with options including repair/refurbishment and full replacement.
- 3 Scheduling & Execution - we coordinate the installation based on you and your customer’s needs.
- 4 Commissioning & Handoff - our certified team installs, tests, and tunes the system. We wrap with documentation, training, and a clear maintenance plan.

SERVICES OFFERED

- Retubing
