

WHY BECKER

BOILER EXPERTS

- ▶ Deep Boiler and Steam Expertise—All Makes. All Models. All Vintages
- ▶ ASME R Stamp & PP Certification
- ▶ 24/7 Emergency Response

LONG-TERM VALUE-ADD PARTNERSHIP

- ▶ Dedicated project manager and lead technician for your account
- ▶ Shared Electronic recordkeeping and asset tracking
- ▶ Coordinated capital project planning
- ▶ Dedicated team availability over planned shutdown periods

OUR STORY

Since 1956, Becker Boiler has been Wisconsin’s trusted name in boiler service, repair, and installation. For nearly 70 years, we’ve built our reputation on solving tough problems, responding fast, and doing things right — whether it’s a no-heat emergency or a planned summer replacement.

In December 2024, Becker Boiler entered a new chapter under new ownership. While our values remain the same, we’re investing in the future — expanding our team, upgrading our technology, and improving the systems that allow us to deliver world-class service at every job.

With ASME certifications, detailed documentation, and 12-hour response guarantees, we’re on a mission to be the Midwest’s most trusted boiler specialists.

CONTACT US

- 📍 1785 E BOLIVAR AVE., ST. FRANCIS, WI 53235
- ☎ (414) 481-8720
- ✉ SALES@BECKERBOILER.COM

BECKER'S 12-HOUR GUARANTEE

Call us, and within 12 hours, the system will be running — or you'll have a diagnosis and repair plan. If not, the service call is on us.

PROCESS BOILERS

Industrial Steam and Boiler Experts for Process

When Downtime Isn't an Option.

Trusted Since 1956 | ASME Certified
All Makes. All Models. All Vintages.

We work with plant managers, process engineers, and maintenance leads to **reduce unplanned downtime and increase reliability** — whether the system is **brand new or decades old**.

We specialize in complex boiler systems used in production-critical environments including:

- ▶ Food & Beverage Processing
- ▶ Dairy/Cheese Production
- ▶ Chemical Processing
- ▶ Metal Treatment Facilities
- ▶ Aggregate Processing
- ▶ Water/Wastewater

EMERGENCY RESPONSE & BACKUP SUPPORT

- 1 Emergency Support**
Many of our long-term relationships start during a crisis. When your current vendor can't respond fast enough—or lacks the technical depth for the issue—we step in.
- 2 Stabilization & Trust**
We fix the issue and identify root causes, building trust through clear communication and fast results.
- 3 Post-Crisis Evaluation**
After stabilization, we review your system and goals with plant leadership to uncover long-term improvement opportunities.
- 4 Ongoing Support**
We develop a service plan focused on reliability and uptime, including PM schedules.

INSTALLATIONS & RETROFITS

- 1 Scoping & Walkthrough**
We review your system on-site to understand capacity needs, tie-ins, and scheduling constraints.
- 2 Proposal & Assessment**
You receive a detailed proposal with performance options, energy considerations, and long-term value in mind.
- 3 Scheduling & Execution**
We coordinate work around your production schedule—often during shutdowns or off-hours—to minimize disruption.
- 4 Commissioning & Handoff**
Our certified team installs, tests, and tunes the system. We wrap with documentation, training, and a clear maintenance plan.

We live our core values **every day** on the job.

- Dependable:** We show up, follow through, and own the outcome.
- Urgency:** We respond fast and prioritize action — especially in no-heat situations.
- Hunger:** We strive to learn more, do better, and take pride in every repair or install.
- Value Our Reputation:** Quality and integrity aren't optional.
- Passionate to the Point of Insanity:** Boilers aren't just a job — they're what we do.
