## Service Report

**Date:** April 23, 2024

**Biologist:** Bill Fuller

**Client:** Coastal Oaks

**Comments:** Five (sterile) grass carp were stocked in the ponds at Coastal Oaks. These fish are herbivorous and will keep the submerged weeds under control. This is a form of biological control and is an integral part of our program.

Charles Aquatics stocks the grass carp as part of our **Full Service Aquatic Management Program.**

The following quantities were stocked:

**Pond #2 -5 Fish**

Please contact Charles Aquatics with questions or comments.
