

WASH & WAX

APPLICATION:

WASH & WAX is recommended to be used on automobiles, 4WDs, motorcycles, boats, trailers, it also can be used on any surface, leaving a streak-free finish.

WASH & WAX was designed to be safe for all materials found on cars and other motor vehicles and hard surfaces, such as aluminum, brass, copper, glass, plastic, rubber, neoprene, and vinyl.

WASH & WAX is a concentrated pH-neutral, biodegradable, non-caustic rust, corrosion inhibitor heavy-duty cleaning gel that cleans up the toughest grease, oil, and soot.

WASH & WAX contains Carnauba wax which leaves a long-lasting protective film and shine.

USE INSTRUCTIONS:

Allow 10-20 minutes for **WASH & WAX** to permeate the dirt and grime before rinsing with water or steam jet.

Sponge cleaning:

Dilute 1-part **WASH & WAX** with 100 parts of water for sponge application, or 2-3 caps per regular 9L bucket.

Sprayer:

Mix 1-part **WASH & WAX** with 20 parts of water.

Pressure washer:

For pressure washers or foam guns, mix 1-part **WASH & WAX** with 10 parts of water.
