

## Preparation for Interior Fogging Pest Service

Thank you for choosing Overkill Pest Control for your interior fogging pest control needs. To ensure the effectiveness of the treatment and the safety of your home, please follow these instructions carefully:

### Pre-Treatment Preparation:

1. **Notification:** Inform all occupants of the property, including pets and children, about the scheduled fogging treatment. Make arrangements for them to be out of the house during the treatment and for 4 hours afterward to allow the treatment to settle.
2. **Covering:** Cover or remove any sensitive items, such as electronics, exposed food, dishes, and utensils. If possible, cover furniture and upholstery with sheets or tarps to protect them from potential residue.
3. **Ventilation:** Ensure that all windows and doors are closed tightly to prevent fogging solution from escaping during the treatment process.
4. **Sealing:** Seal any cracks, crevices, or openings where pests may hide or escape to ensure maximum effectiveness of the fogging treatment.
5. **Access:** Ensure that our technicians have unobstructed access to all areas of your home where fogging treatment is needed. This includes moving furniture away from walls and ensuring that all rooms are accessible.

### During Treatment:

1. **Vacate Premises:** Vacate the premises and remain outside for the duration of the fogging treatment plus 4 hours to minimize exposure to treatment chemicals.

### Post-Treatment Instructions:

1. **Ventilation:** After the fogging treatment is complete, ventilate your home by opening windows and doors to allow fresh air to circulate. This helps to dissipate any residual fogging solution and odor from the treatment.
2. **Avoid Cleaning:** Refrain from cleaning treated areas for at least 24 hours after the fogging treatment to allow the products to work effectively. This includes sweeping, mopping, or wiping down surfaces.
3. **Refrain from Contact:** Avoid touching treated surfaces or allowing pets and children to come into contact with treated areas until they have dried completely.
4. **Follow-up Inspection:** Our technicians may schedule a follow-up inspection to assess the effectiveness of the fogging treatment and address any lingering pest issues. Please cooperate with these inspections to ensure the best possible outcome.
5. **Report Any Concerns:** If you notice any signs of continued pest activity or have any concerns about the treatment, please contact us immediately. We're here to help and will address any issues promptly.

By following these instructions, you can help ensure the success of your interior fogging treatment and maintain a pest-free home environment. Thank you for choosing Overkill Pest Control.
