

Studebaker Rubber Glass Seal Profiles

Studebaker Glass & Rubber, Idaho Falls, ID (208) 390-6306

Windshield/Back/Quarter

803352: Commonly used with top hinged, tilt-out windshields in Studebaker cars, 1932-36

805752: Commonly used in late '20's and '30's for tilt-out windshields. Fits in T-slot of glass frame to seal against outer frame.

807557: Glass setting channel. Holds 1/4" glass into steel glass carrier channel and incorporates a weather-lip. Dimensions: 3/8" width at bottom, 11/16" deep.

818852: Used as both windshield and back glass seal with 1/4" glass, has thick weather-lip and notch for bead reveal molding if required.

819052: Used as a seal for windshields, back glass, and stationary quarter window. Has a thick weather-lip and a notch for bead reveal molding if required. For ¼” glass.

819152: Used on windshields, back glass, and stationary quarter windows without chrome reveal molding. For ¼” glass.

819252: Seal channel used for windshield, backglass and stationary quarter windows. For windows with chrom reveal molding. Plain compression channel for ¼” glass. Found on many makes in the 1930’s.

819452: Plain “U” channel for ¼” glass. Used in windshields, back glass and quarter windows.

819552: Windshield seal. Used with or without chrome reveal molding. Channel for ¼” glass with lip for attaching beaded molding. Frequently used on many makes in later 1920’s thru 1930’s.

809852: Universal gasket, for divided windshield center-post. Depending on your application, trimming may be required, combines inner and outer gasket in one piece. Available in 20 inch length only.

800383: Back window seal, many applications.

801252: Cross section of windshield gasket used in most post-war Studebakers, available only in lengths of 12 feet. Can be mitered and glued for sharp corners.

800477: Glass seal for stationary quarter window on various late 1930's thru 1946 Studebakers. Order by the foot.

805452: Windshield seal for 1941-46 Studebaker cars with stainless molding. This is not identical but will work. Most windshield gaskets of this period are available as unitized and correct gaskets. See our other rubber listings by application.

800587X25: Fender welt between fenders and body. Bead is flexible and paintable. Minimum 25 foot roll.
