Indoor Pool Dehumidification System

Why do you need it?

- To provide a healthy and comfortable environment for people in the pool area.
- To control odors in the pool area and in the rest of the building.
- To effectively control temperature and humidity.
- To maintain all building surfaces above the dew point.
- To protect the building from damage due to condensation and corrosion.

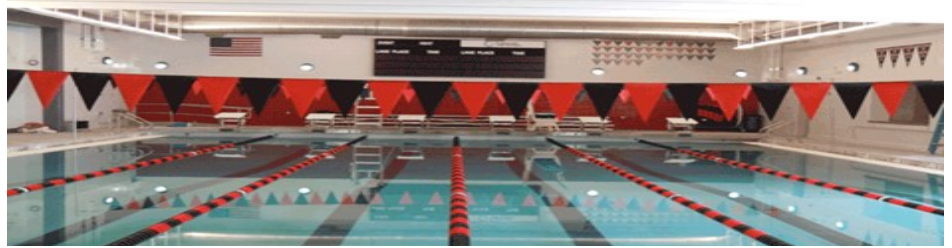

WHY EASi?

- Custom Built to Fit Your Facility
- Low Maintenance Costs
- Well Established Energy Saving Data
- Customer Service

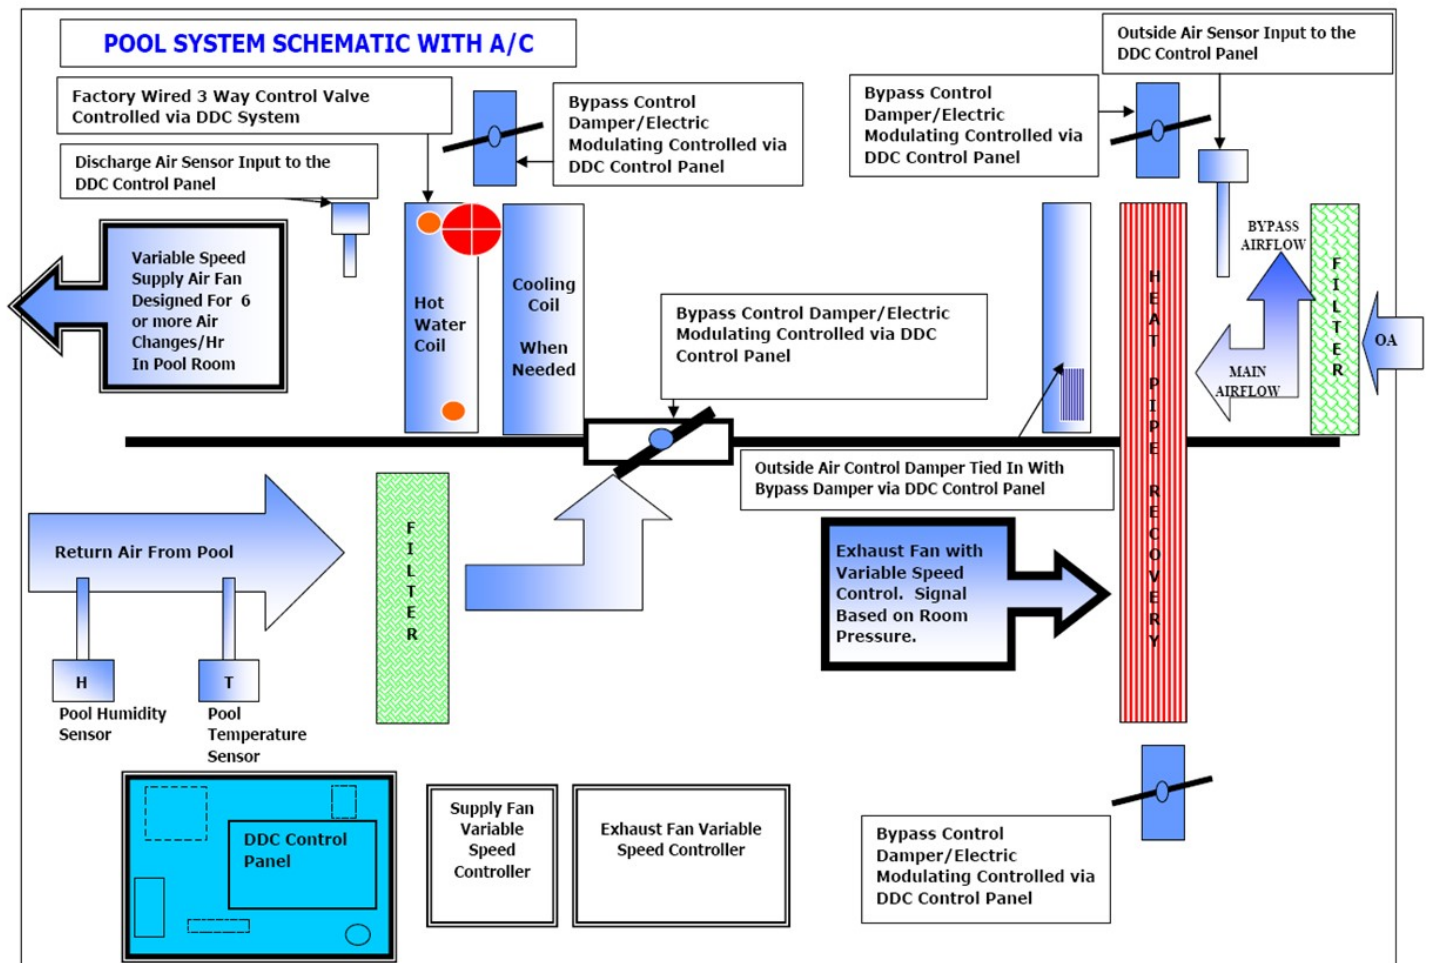

Taking the Step to Net Zero Energy

Advantages:

- Eligible for Energy Efficiency Rebates
- Lowest Maintenance Cost
- Lowest Operating Cost
- Easily Maintained by In-house Personnel
- Continuous Fresh Air 24/7
- Premium Air Quality
- Best in Energy Efficiency
- Healthy and Comfortable Environment
- 100% Purge Capacity for Pool Shocking
- Indoor/Outdoor Construction
- Industrial Grade Aluminum
- Light Weight for Rooftop Installation
- High Quality Construction
- Long Life Expectancy

How it works:

Working to Provide Better Air Quality

P.O. Box 405
Gorham, ME 04038 USA

General Information or requests: support@efficientairsys.com

Our construction includes:

- Aluminum Industrial Duty Direct Drive Plenum Fans with Internal Vibration Isolation to reduce noise
- Modulating Airfoil Aluminum Dampers
- Generously sized Single Side Access Doors with large locking handles and adjustable compression latches
- Separate High and Low voltage wiring sections: All secured in weather tight conduit and neatly arranged wiring trays
- Lifting lugs for simplified crane duty

Options include:

- Heating with Hot Water, Steam, Factory Integrated Gas Heat, or Electricity
- Cooling with Direct Expansion, or Chilled Water
- Condensing Unit
- Modular Construction

We also retrofit with a Plenum base to fit your own roof curb.

Warranty:

- 3 year standard factory warranty
- 5 year optional non-prorated warranty
- 10 year optional non-prorated warranty
- Semi-Annual optional Preventive Maintenance Contracts
