**SulGas** is a highly esteemed technical forum that focuses on sulphur recovery and gas treating. It stands out for its commitment to neutrality and quality, enabling unbiased knowledge exchange among experts. By fostering collaboration and minimizing distractions, SulGas addresses complex industry challenges and drives innovation. With a diverse range of participants from various sectors, SulGas ensures comprehensive discussions and holistic solutions. Furthermore, it pays special attention to India's specific needs, tailoring its focus to equipment design, process optimization, operations, analytical methods, and troubleshooting. As a result, SulGas serves as a valuable resource, advancing the sulphur recovery and gas treating industry, overcoming obstacles, and optimizing operations for the benefit of all stakeholders involved.

## TESTIMONIALS

High quality technical forum in south Asia in the areas of sulphur and gas treatment. Great papers are presented at the conference. Many networking opportunities.

Very well organised and conducted small conference. The size of the conference was key in ensuring that there was enough diversity and yet not lose focus.
