## SulGas® Mumbai 2025 - Successful Seventh Edition of Sulphur Recovery & Gas Treating Conference

Mumbai, India: The 7th edition of SulGas®, organized by Three Ten Initiative Technologies LLP, took place from 5-7 February 2025, at Holiday Inn, Mumbai. The event brought together public-sector oil companies, private refiners, petrochemical, chemical, and fertilizer plants, licensors, engineering companies, solvent and column equipment manufacturers, as well as control and instrumentation companies. SulGas® 2025, advised by experts from various sectors of the sulphur and gas processing sphere, received extensive support from Indian and foreign industry associations and media houses.

Supported by Title Sponsor - Ametek Process Instruments, Platinum Plus Sponsor - Thermal Systems (Hyd) Pvt. Ltd., Platinum Sponsors – Aecomtronic Corporation, Worley Comprimo, Delta Controls Corporation, Fluor, Industrial Ceramics Ltd., KVT Technology, PnP Industries India Pvt. Ltd., SGS Sulphur Experts, WIKA; Exhibitors – Dow, and Optimized Gas Treating and Diamond Sponsor – Euro Support; Official Publication – Sulphur Magazine; Media partners Chemical Industry Digest, PTQ/Digital Refining and World Oils amplified the event's reach, further establishing SulGas® as an essential forum for sulphur recovery and gas treating professionals worldwide.

SulGas® 2025 served as a significant platform for a high-impact technical forum on sulphur recovery and gas processing, representing the foremost gathering of experts in the field in India and South Asia. The event saw participation from over 154 attendees, representing more than 68 companies across various areas of sulphur handling and gas processing, including public and private refineries, the oil and gas industry, petrochemicals, chemicals, and related sectors. Notable end-users such as BPCL, HMEL, HPCL, IOCL, MRPL, Nayara, and RIL were among the participants.

SulGas® 2025 provided an ideal opportunity for experts to engage with their peers, share best practices and troubleshooting tips, and discuss advanced technologies and operating procedures with technology providers, vendors, and licensors. The conference's agenda featured 10 sessions, covering Foundations Masterclass, Gas Processing and Troubleshooting, From Biofeeds to Beyond Claus, SRU Process Automation and Instrumentation, Gas Processing: Challenges and Innovations, Integrated Approach to SRU Optimization, and Minimizing Risks in SRU Startup and Shutdown. The conference featured 25 speakers in interactive technical sessions, fostering maximum technical exchanges among participants. Additionally, a dedicated exhibition area with full-day access for all delegates was made available. Each session concluded with a detailed panel discussion, sparking valuable dialogue between the audience and speakers.

Three Ten Initiative Technologies LLP, headquartered in Visakhapatnam, India, is a global provider of services encompassing advanced process control, custom engineering software, simulation, and custom modelling. They also offer software products like ProTreat® and SulphurPro® for gas treating and sulphur recovery, along with organizing specialized technical conferences such as SulGas®, Distillation Experts Conclave®, and SAFETEMPER. The company provides senior-level training in various areas and young engineer training under the SkillNXT Programs. For further details, contact [info@the310i.com](mailto:info@the310i.com).
