

**It takes...**

**2 to  
connect**

# DUOX plus

It takes 2 to connect **FERMAX**

## **Solutions for buildings.**

The only fully digital  
system in 2 wires

New version of BLUE  
with a completely revamped  
technology and ready to allow call  
forwarding from our WiFi monitors to  
the mobile phones of millions of users  
around the world.

A major technological milestone and  
a further step towards making the  
connected video door entry system a  
reality in all homes.

**DUOX**plus

A system designed for the  
**professional installer ...**

## Wiring **flexibility**

2 NON-POLARISED WIRES

### **Compatible with a wide variety of wiring.**

In retrofit installations, DUOX PLUS can be installed using existing wiring.

Reduced errors, simplified installation on only 2 non-polarised wires.

## **Simplicity** of installation

It saves time during installation and maintenance.

## Easy **programming**

**Monitors:** one person can program the installation in a few seconds directly from the OSD menu.

**Panels: digital panels** are programmed from the keypad, while on our **pushbutton** panels, the amplifier includes a voice-guided programming system.

## **Scalable** system

For all kinds of projects; large or small, simple or complex, vertical structures or horizontal installations.

## **Digital** transmission

**FULL DIGITAL.** All information (audio, video and data) is fully digital, ensuring the same audio and video quality throughout the installation.

... and for **the end-user**

## Connectivity

Our WiFi video door entry systems open up the world of connectivity to every type of building and home, with call forwarding to mobile phones built into even the most basic monitors.

## Accessibility

Adapted and accessible products for everyone, both inside and outside the home.

## Security Photocaller

The video intercom automatically captures an image of the caller on the monitor and on the mobile phone in case of WiFi models.

# DUOX plus

It takes 2 to connect

The world's first  
100% digital  
Smart System  
in 2 wires

The most powerful and fastest 2-wire system to install and program.

Installation using existing wiring.

2 communication channels within the same block.

Consistent quality throughout the installation.

Up to 100 blocks and sub-blocks.

Smart accessories for installations of all sizes.

Up to 10 panels and 10 guard units at the general entrance.

Up to 10 panels and 10 guard units in each building or block of apartments.

Maximum distance between extremes of the installation: 3.000m.

Maximum point to point distance without regeneration: 500m.

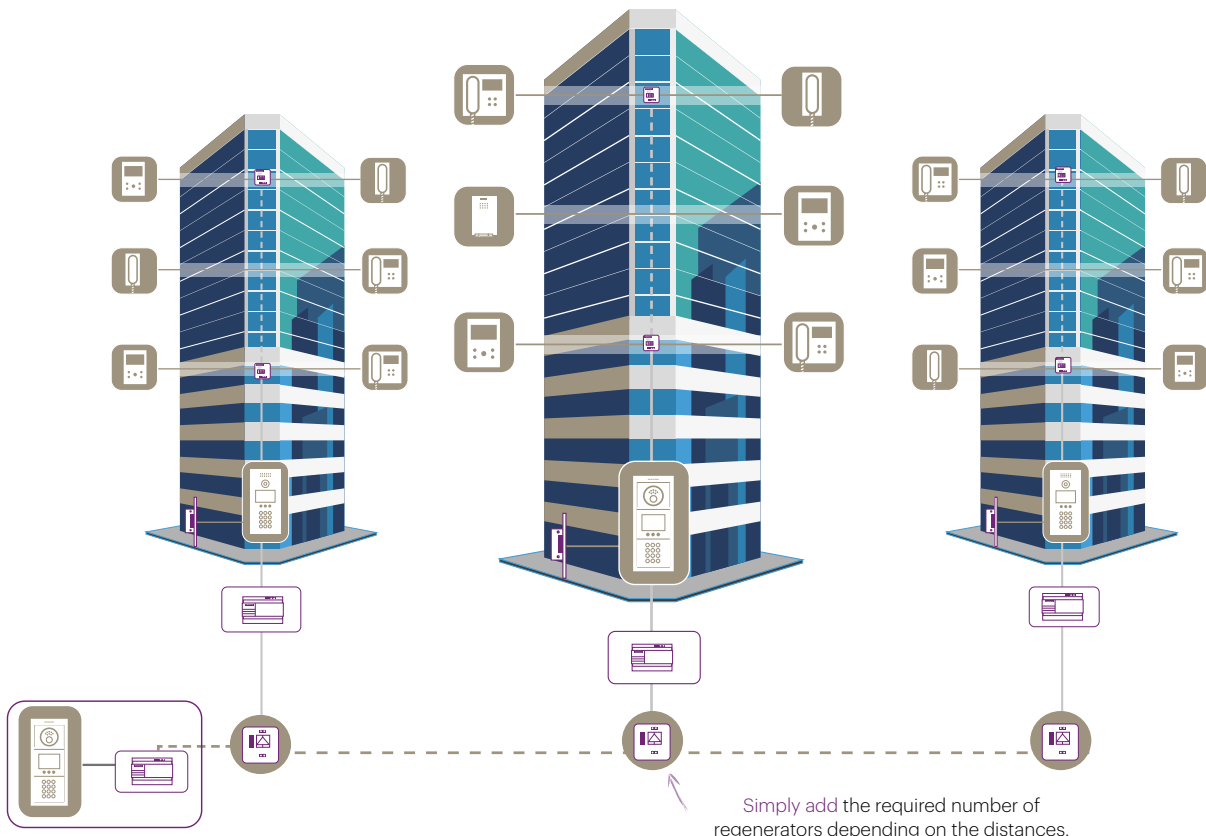

A **simplified 2-wire installation** without polarity throughout the entire installation. DUOX PLUS is a highly flexible system that can be **installed with most of the existing cables**. It is a digital system and hence it enables to avoid electrical interferences or analogue noise and maintains the same **optimum audio and video quality throughout the entire installation**, from the first apartment in the project to the most distant one.

The DUOX PLUS system **is installed in the same way for both audio and video**, allowing the users to choose which terminal they prefer to have it at home. Additionally, it is the only **2-wire system that can allow two communication channels in the same block**, i.e. two panels calling two different apartments at the same time. It has a built-in voice guided **programming system in pushbutton outdoor panels** and configuration via **graphic menu in digital panels and monitors**. Its digital technology adapts to all types of topologies and distances, making it possible to successfully install any project: **from small individual buildings to large residential projects**.

All these features make DUOX PLUS the **fastest system to quote, install and program**.

A system that can be perfectly adapted to all situations, both for new construction and retrofit.

FOR ALL TYPES OF PROJECTS WITH LONGER DISTANCES, VERTICAL STRUCTURES OR HORIZONTAL INSTALLATIONS.

## 1. Outdoor panel

### SKYLINE PANEL

#### 3.5" graphic display on digital panels:

- Display activation by presence sensors.
- Electronic directory agenda of residents.
- Menu-driven configuration from the keypad.
- Information pictograms (One-To-One) with the communication status (calling, in communication, door open, channel busy).
- Upload images, logos and personalised messages.
- Alphanumeric call to apartment.

#### Keypad:

- The metallic keypad is made of zamak. It has permanent backlighting.
- The keypad can be used to open the door by entering a previously programmed PIN code. The number of different users/codes allowed in the DUOX PLUS system is 10,000.

Modular panel.

Made in anodised aluminium (**IP43 IK07**).

Chromed zamak pushbuttons and reinforcements.

Wide angle colour camera (Vertical=80°, Horizontal=100°).

Illumination for vision in low-light conditions.

The module-frame clip-on assembly system is very simple and effective. The modules fit perfectly into the profile.

Watertight tapes prevent water and dirt to get in. Once the panel is assembled, the different modules are connected to each other.

SKYLINE consists of **9 DIFFERENT-SIZED FRAMES** where different modules can easily be fitted. Modules come in 2 sizes, designated V and W. W is twice the size of V.

### 8829 JOINING BOLTS SET

It allows to combine two or more frames. One set is required for each additional frame installed on flush box.

A cable is required per each additional frame in order to connect the pushbuttons modules between both frames (70 cm).

### 2541 DUOX PLUS/VDS CONNECTION CABLE (6W)

### 2542 DUOX PLUS/VDS CONNECTION CABLE (5W)

This cable is suitable only for Cityline and Marine pushbutton panels.

\* 3 Series only for Cityline

To make DOUBLE modular frames, add to the SINGLE frame a DOUBLE PANEL MODULAR FRAME KIT (ref.9200) Horizontal: 341mm.

To make TRIPLE modular frames, add to the SINGLE frame a TRIPLE PANEL MODULAR FRAME KIT (ref.9201) Horizontal: 471mm.

## CITYLINE PANEL

**CITYLINE** is a monoblock concept panel. It is characterised by its curved profile.

It is manufactured in a highly weather **resistant anodised aluminium profile (IP43 IK7)**. The pushbuttons and displays are chromed zamak, the amplifier frontal in aluminium and the interior is protected by a stainless steel grid.

The watertight pushbuttons are designed and tested in the most demanding conditions to achieve great durability and reliability.

### 3.5" graphic display on digital panels:

- Display activation by presence sensors.
- Electronic directory agenda of residents.
- Menu-driven configuration from the keypad.
- Information pictograms (One-To-One) with the communication status (calling, in communication, door open, channel busy).
- Upload images, logos and personalised messages.
- Alphanumeric call to apartment.

### Keypad:

- The metallic keypad is made of zamak. It has permanent backlighting.
- The keypad can be used to open the door by entering a previously programmed PIN code. The number of different users/codes allowed in the DUOX PLUS system is 10,000.

Made in anodised aluminium (**IP43 IK07**).

Chromed zamak pushbuttons and reinforcements.

Wide angle colour camera (Vertical=80°, Horizontal=100°).

Illumination for vision in low-light conditions.

## Direct Cityline panel

ref.73631

Panel dimensions: 130x246 (S5)  
Flush box dimensions: 115x233x45 (S5)

The DIRECT panels have a keypad to call the apartments.  
The keypad admits 1 code to open the door.

**73631 DUOX PLUS DIRECT VIDEO CITY PANEL S5**

**8855 FLUSH BOX S5**

**8829 JOINING BOLTS SET**

**NOTE:** Recommended to add DIRECTORY SKYLINE PANEL S5 (ref.7334 and 2 units ref.7445).

## Digital Cityline panel

ref.73871

ref.73878

Panel dimensions: 130x341 (S7)  
Flush box dimensions: 115x328x45 (S7)

The DIGITAL panels include a KEYPAD and a 3,5" EXTRA display.  
The keypad integrates access control function (10.000 codes).

## 2. Monitors and telephones

All monitors are available in standard and WiFi models.

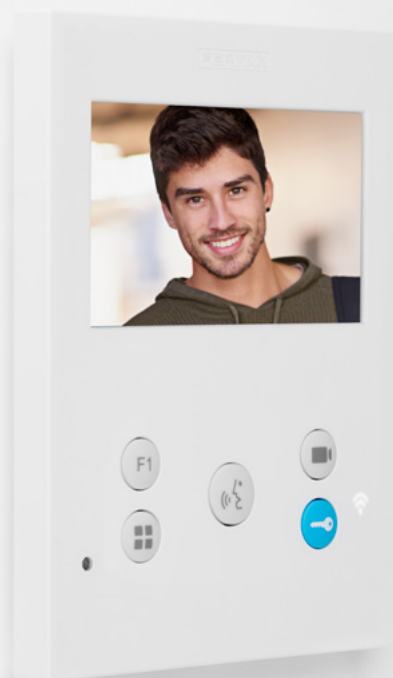

### VEO Monitor

4.3" (16:9) colour screen  
With handset

### VEO-XS Monitor

4.3" (16:9) colour screen  
Hands-free

Made of high-impact ABS white plastic.

Silicone buttons.

Surface installation.

Additional configurable functions such as activating second access, courtesy light, etc. (DUOX PLUS relay required).

Colour screen with OSD menu.

Do not disturb function.

Settings: contrast, brightness, colour and volume.

Date and time setting.

Apartment entrance doorbell.

Automatic image capture per call (memory up to 150 photos).

Auto-on: activate the outdoor panel and switch the display to another panel or camera.

Doormatic function (VEO-XS y VEO-XL): Automatic door opening for professionals (offices, clinics, etc.).

The same wall mounting connector is used for all monitor models. This makes the installer's job easier and provides great flexibility, allowing each resident in the building to choose the monitor they prefer.

# VEO-XL Monitor

7" (16:9) colour screen  
Hands-free

## Call divert to mobile

All the **WiFi** monitors are equipped with WiFi connection that allows forwarding calls to mobile devices.

The **BLUE** by FERMAX application allows end-users to manage the functions of the video door entry system and much more directly from their smartphone or tablet.

All **WiFi** monitors include a sticker with a **QR** code so that end-users can download the **BLUE** by FERMAX app.

They can easily pair their monitor and enjoy the call divert to mobile.

Support for mounting the DUOX PLUS VEO, VEO-XS and VEO-XL monitor on the wall.	

**Note:** In models with inductive loop, the induction system included in the monitors allows to transform the audio signal into a magnetic field adapted to the hearing aids or prostheses of hearing impaired persons.

## Call divert to mobile/tablet

Free application  
**BLUE by FERMAX**

With the DUOX PLUS WiFi monitors, the **call divert to mobile phones comes as standard.**

It allows to **establish communication with the outdoor panels and open the door.**

It allows to **see who is calling** before answering and **open a second auxiliary door.**

**Automatic image capture** of the caller and their **register in the call log.**

Up to **8 smartphones/tablets in the same apartment** can receive the call **simultaneously.**

It is as simple as downloading the **BLUE by FERMAX** app from Google Play or the Apple Store.

## App functions and menu

### Answer/pick up the call

**Conversation.** Action buttons in conversation:

- Mute. So that you cannot be heard from the outdoor panel.
- Video off. Audio only. To reduce data consumption in 4G mode.
- Change the outdoor panel or camera.
- F1 Activation of an additional function protected by the mobile phone unlocking code: PIN, fingerprint, pattern or facial recognition.
- Door opening: protected by mobile phone unlocking code: PIN, fingerprint, pattern or facial recognition.

### End of conversation.

### Door opening.

### Auto-on.

### Call to concierge.

### Additional F1 function.

### Call history.

### Home settings.

### Image capture.

### Home menu.

## Smart speakers

**NEW**

By connecting to **Alexa and Google Home**, you can receive call notifications from the video intercom on a smart speaker or display.

You can also use **your voice to open the door**, either with smart speakers or displays or with Siri from your iOS device (iPhone, iPad or Apple Watch).

Door opening without the keys

Change the camera

Hang up the call

Image capture and call history

Answer the call

Open the door

More information on **BLUE** by **FERMAX**

With the **BLUE** by **FERMAX** application the end-users can:

Pretend they are at home, even if they are not.

View the entrance camera via the auto-on function without the need of a previous call.

Open the door without the keys.

View the history of missed and received calls, as well as the images captured of the callers.

View other panels connected to your installation, either from the panel or via the camera interface.

Receive all calls from the video intercom on the mobile phone.

Answer and open the door from any location.

Invite their family to use the BLUE app when they require it.

Activate the additional function F1 configured in the video intercom from the mobile phone.

Request a concierge call in the installation with a DUOX PLUS guard unit.

## Telephones

VEO

EXTRA

iLOFT

**VEO, LOFT and iLOFT** telephones include the following features:

- Door opener button and call to guard.
- 5 selectable ringtones.
- Ring volume control.
- Doorbell.

**Loft Extra and iLOFT** phones include buttons for additional functions: lights on 2nd door opening, etc. Loft Extra: 2 additional buttons; iLOFT: 1 additional button.

**VEO. LOFT:** Made of high-impact ABS with a texturised finish for easy cleaning and ultraviolet protection. It has many attachment points for wall mounting, as well a coiled cord with telephone plug connectors. A magnet located in the handset facilitates to hang it up correctly.

### 3444 DUOX PLUS VEO TELEPHONE

Dimensions: 82x214 x43 mm.

### 3452 DUOX PLUS LOFT EXTRA TELEPHONE

Loft Extra telephone dimensions: 85x220x40mm.

### 3450 iLOFT DUOX PLUS TELEPHONE

Dimensions: 90x146,5x20mm.

Compact and extra slim. Made of ABS. iLOFT telephone allows communication with the outdoor panel in hands-free mode. The integrated digital audio technology ensures high-quality and interference-free communication.

## Monitors and telephones accessories

ref.9410

ref.9420

ref.5636

ref.3749

ref.3389

### 9410 VEO MONITOR DESKTOP SUPPORT

### 9420 VEO-XS AND VEO-XL MONITOR DESKTOP SUPPORT

### 3749 VEO/LOFT TELEPHONE DESKTOP SUPPORT

### 5636 iLOFT TELEPHONE DESKTOP SUPPORT

Desktop supports allow to answer a call to the entrance panel from the office desktop. Made of stainless steel (AISI 316L).

### 3388 UNIVERSAL DECORATIVE FRAME. 120X240

### 3389 UNIVERSAL LARGE DECORATIVE FRAME. 210X240

Decorative Frames are aesthetic complements. Useful in retrofitting applications or replacement of previous equipment.

### 3441 LOFT HANDSET WITH INDUCTIVE LOOP

### 3443 VEO HANDSET WITH INDUCTIVE LOOP

### 3. Guard unit

**DUOX PLUS Guard Unit** has a multi-functional 4,3" capacitive touch screen and quick function access buttons for easy and convenient management.

Its unique handset design incorporating a magnet enables the end-user to put it back into position correctly. It includes a stainless steel desktop support. It allows a surface installation.

ref.9423  
Dimensions: 200x200mm  
Desktop support included

#### 9423 DUOX PLUS AUDIO GUARD UNIT

Three operation modes:

- **Day:** it receives calls from outdoor panels and apartments. The calls from the outdoor panel to apartments are always received in the guard unit.
- **Mixed:** the calls from the outdoor panels are received in the apartments and it can also be configured to forward them to the concierge unit after 15 s.
- **Night:** only calls from the outdoor panels to apartments are allowed. The guard unit does not receive any call.

## 4. Installation devices

### SIMPLE INSTALLATION (1 Building)

LESS COMPONENTS REQUIRED FOR INSTALLATION.  
NO FLOOR DISTRIBUTORS. NO DECODERS. NO SWITCHERS

The only materials required are:

- Panel
- Power Supply
- Monitors and telephones
- Line adaptors

Apartments are easily connected at each level using simple terminal strips.

**NOTE:** Depending on the type and condition of cable and distances, additional regenerators, decoders or power supply might be required.

## Power supply and Adaptors

### For most common cases

In the most common installations, DUOX PLUS does not require any installation devices other than the power supply and a pair of line adaptors per riser. The maximum number of monitors that can be connected to each power supply ref. 4825 depends on the installation topology, cable type and monitor model, as shown in the tables below.

ref.3255

ref.4825

#### 3255 DUOX PLUS LINE ADAPTOR

Necessary at the beginning and the end of every riser.

#### 4825 POWER SUPPLY + FILTER 24VDC-2.5A DIN10

TERMINAL CONSUMPTION TABLE PER POWER SUPPLY IN DISTRIBUTION (6 PER FLOOR)

	NO WIFI			WIFI		
	VEO	VEO-XS	VEO-XL	VEO	VEO-XS	VEO-XL
1.0mm	40	40	34	28	28	24
0.5mm <sup>2</sup>	40	38	30	24	24	18
0.2mm <sup>2</sup>	32	26	20	18	18	12

TERMINAL CONSUMPTION TABLE PER POWER SUPPLY IN CASCADE

	NO WIFI			WIFI		
	VEO	VEO-XS	VEO-XL	VEO	VEO-XS	VEO-XL
1.0mm	40	38	30	26	22	20
0.5mm <sup>2</sup>	32	28	22	20	18	14
0.2mm <sup>2</sup>	16	14	10	12	10	8

### For specific cases

ref.4840

ref.3289

ref.4802

ref.4800

#### 4840 POWER SUPPLY DIN-6 100-240VAC/24VDC-2A

To be used exclusively with the filter ref. 3289 or with the 2-way regenerator ref. 3269.

#### 3289 DUOX PLUS FILTER 24VDC

In case the ref. 4825 cannot be installed due to lack of space. This filter can be used only with 24Vdc power supply (ref. 4840). Do not use it with 18Vdc power supply.

#### 4802 POWER SUPPLY DIN4 230VAC 12VAC/1A

12Vac for altern current lock release.

#### 4800 POWER SUPPLY DIN4 230VAC 12VAC/1,5A

12Vac for altern current lock release.

## Lock Release

### UNIVERSAL DOOR LOCK RELEASE

#### 29588 LOCK RELEASE 300N-412-S MAX

#### 67501 UNIV. LOCK RELEASE 990N-P22 MAX 10-24VAC/DC

### UNIVERSAL ELECTRIC STRIKE

#### 6750 UNIV. ELECTRIC STRIKE 990N MAX 10-24VAC/DC

#### 6752 UNIV. ELECTRIC STRIKE 990A MAX 12-24VAC/DC

**Note:** If other models of door lock release are used and their power consumption is greater than 250mA, an additional separate power supply must be used.

**EXTENDED INSTALLATION** (multiple buildings or longer distances)

**FOR ALL KINDS OF PROJECTS WITH LONGER DISTANCES, VERTICAL STRUCTURES OR HORIZONTAL INSTALLATIONS**

**DUOX PLUS allows you to push the boundaries of digital technology.**

Thanks to the digitalisation of the system, it can now be used in all kinds of installations. The more complex the installation is, the more powerful DUOX PLUS will be. Regenerators and decoders are the only elements to be added for large installations or long distances.

## Regenerators and Decoders

Regenerators and decoders take scalability to the next level. No installation, no matter how large, can resist DUOX PLUS.

ref.3269

ref.3268

ref.9419

ref.9425

### WHEN IS IT RECOMMENDED TO INSTALL THE SMART DECODER?

- When we have to install more than 6 terminals per floor in the building.
- When the distance between the terminals and the riser is greater than 25 metres or when this distance is unknown.
- When different types of wires are mixed in the same installation or all the cables go to the same point.

### REGENERATORS

It allows to regenerate and amplify the signal in both ways, as well as amplify distances and number of indoor terminals. Moreover, the connected sections to input and output protect against short-circuit, charge and signal reflections mutually. Maximum 5 units in cascade. Up to 99 if connected in parallel.

#### 3269 2/W DUOX PLUS REGENERATOR

It has 1 input and 2 outputs. By having 2 outputs (also isolated from each other) it enables the number of risers to be increased. Requires 24Vdc power supply without filter (ref. 4840). For more information: <https://fermax.com/intl-en/documents>

#### 3268 1/W DUOX PLUS DUAL REGENERATOR

It has 1 input and 1 output. As per factory default settings, electrical energy does not flow, but this can be configured via a dipswitch so that the data (which regenerates) as well as the power supply can pass through. That way there is no need to always install a power supply at the output. The number of devices that can be fed at the output without an additional power supply units will depend on the power that reaches the regenerator. For more information: <https://fermax.com/intl-en/documents>

	3269	3268
<b>Number of inputs</b>	1	1
<b>Number of outputs</b>	2	1
<b>Regenerates</b>	YES	YES
<b>Isolates</b>	YES	YES
<b>Incorporates power supply filter</b>	YES	NO
<b>Additional conversation channel per riser</b>	NO	YES

(in multichannel mode)

### DECODERS

#### 9419 10/W DUOX PLUS DECODER/ISOLATOR

10-outputs floor decoder. One output per home, allowing up to 3 terminals (monitors/ telephones) per home. Multiple decoders can be installed on each floor. Each output allows to increase the diversion distances on a floor up to 100 m.

In the event of a malfunction (short circuit) of any of the decoder's outputs, both the input DUOX PLUS bus and the rest of the outputs will continue to operate normally. In addition, when a short-circuit occurs on an output, the red LED associated with the output will light up, indicating the output on which the fault has occurred.

It is not necessary to enter a house to program the address of the terminal since the decoder includes a group of microswitches (dipswitches) to program the addresses of each of its outputs (sequential programming). Also, the decoder addresses can be programmed non-sequentially (open programming).

The decoder is powered directly from the DUOX PLUS bus. With DIN10 rail mounting and removable terminal strips for easy wiring and installation.

#### 9425 4/W DUOX PLUS DECODER/ISOLATOR

Same as ref. 9419 but this is a 4-outputs floor decoder (DIN4) and the terminal strips are not removable.

DIN 6 rail mounting (including lateral fixing brackets for screws, width 106 mm). If the lateral fixing brackets for screws are removed, the width is 89 mm (DIN 5).

## ADDITIONAL FUNCTIONS

### MORE SECURITY

Add IP cameras to monitor specific areas of the building

Bring security to all your installations!

#### 9453 IP/DUOX PLUS INTERFACE+CAMERA KIT

It includes the IP/DUOX PLUS camera interface (ref.9454) and the IP camera (ref.9985) already pre-configured for the most common case of an outdoor panel and an additional camera. It also includes the camera power supply (ref.9982) and its adapter (ref.9984).

**IMPORTANT:** Check compatibility with the technical department.

#### 9454 IP/DUOX PLUS CAMERA INTERFACE

Allows the integration of IP video CCTV cameras into a DUOX PLUS installation. It transforms the IP video signal (standard RTSP) into a DUOX PLUS signal that is connected directly to the DUOX PLUS bus.

- Generally, one interface will be required for each camera installed in the DUOX PLUS installation. However, in the particular case of 2 cameras in the same block, up to 2 cameras can be configured on the same interface (in this case a PoE switch is required).

- Each camera will be powered externally with its additional power supply (ref. 9982+ref. 9984) or via a PoE switch.

- The interface is powered directly from the DUOX PLUS bus.

An outdoor panel can be associated to the interface, so that, while the IP camera is being viewed, it is possible to activate the opening of this panel.

**IMPORTANT:** Check compatibility with the technical department.

#### 9985 PERIPHERAL IP DOME CAMERA

IP minidome camera (ceiling mount), 2MP resolution, 2.8mm fixed lens, IR LEDs, 30m range.

#### 9982 POWER SUPPLY PERIPHERAL CCTV CAMERA

Power supply for analogue or IP auxiliary cameras.

#### 9984 POWER ADAPTOR PERIPHERAL CCTV CAMERA

Power adapter, with a jack plug to connect the power supply to the camera.

#### 1586 4 POE PORTS SWITCH

ref.9985

ref.1586

## MORE FUNCTIONS

Activate a second gate, garden gate, or garage entrance door with DUOX PLUS relays that connect directly to the system bus, without additional wiring

ref.3233

### 3233 DUOX PLUS BASIC RELAY

Basic functions. Allows you to activate an additional function from F1 or F2 of the DUOX PLUS terminals, without additional wiring. The relay can also be activated by the call or by activating the lock release. It can be connected at any point of the bus.

DIN 6 rail mounting (including lateral fixing brackets for screws, width 106 mm). If the lateral fixing brackets for screws are removed, the width is 89 mm (DIN 5).

ref.3267

### 3267 DUOX PLUS RELAY MODULE

Advanced functions. Allows you to pair 2 relays, 1 as a transmitter and other as a receiver, to perform remote activations. An address can be programmed with the address assistance (001-999) using the DUOX PLUS Programmer ref. 3254 via the relay's telephone connector.

DIN 6 rail mounting (including lateral fixing brackets for screws, width 106 mm). If the lateral fixing brackets for screws are removed, the width is 89 mm (DIN 5).

ref.2040

## CALL ACCESSORIES

### 2040 ELECTRONIC CALL EXTENSION BELL

## CABLES

ref.5925

### 5925 DUOX PLUS PARALLEL CABLE 2x1mm2

## TESTER

ref.9404

### 9404 DUOX PLUS TESTER

The DUOX PLUS Tester is the ideal tool for the installer. It is used to assess the operation of each outdoor panel with the DUOX PLUS terminals in an installation, without the need to enter the apartments.

A test is initiated from a panel to one or more terminals and the operation of that panel with those terminals is checked.

This action is performed from a user interface on a web browser. From a mobile phone, tablet or computer we can connect to the installation through the WiFi generated by the TESTER DUOX PLUS.

DIN 6 rail mounting (including lateral fixing brackets for screws, width 106 mm). If the lateral fixing brackets for screws are removed, the width is 89 mm (DIN 5).

This table has been configured assuming 1mm<sup>2</sup> multi-core parallel cable and floor distribution.

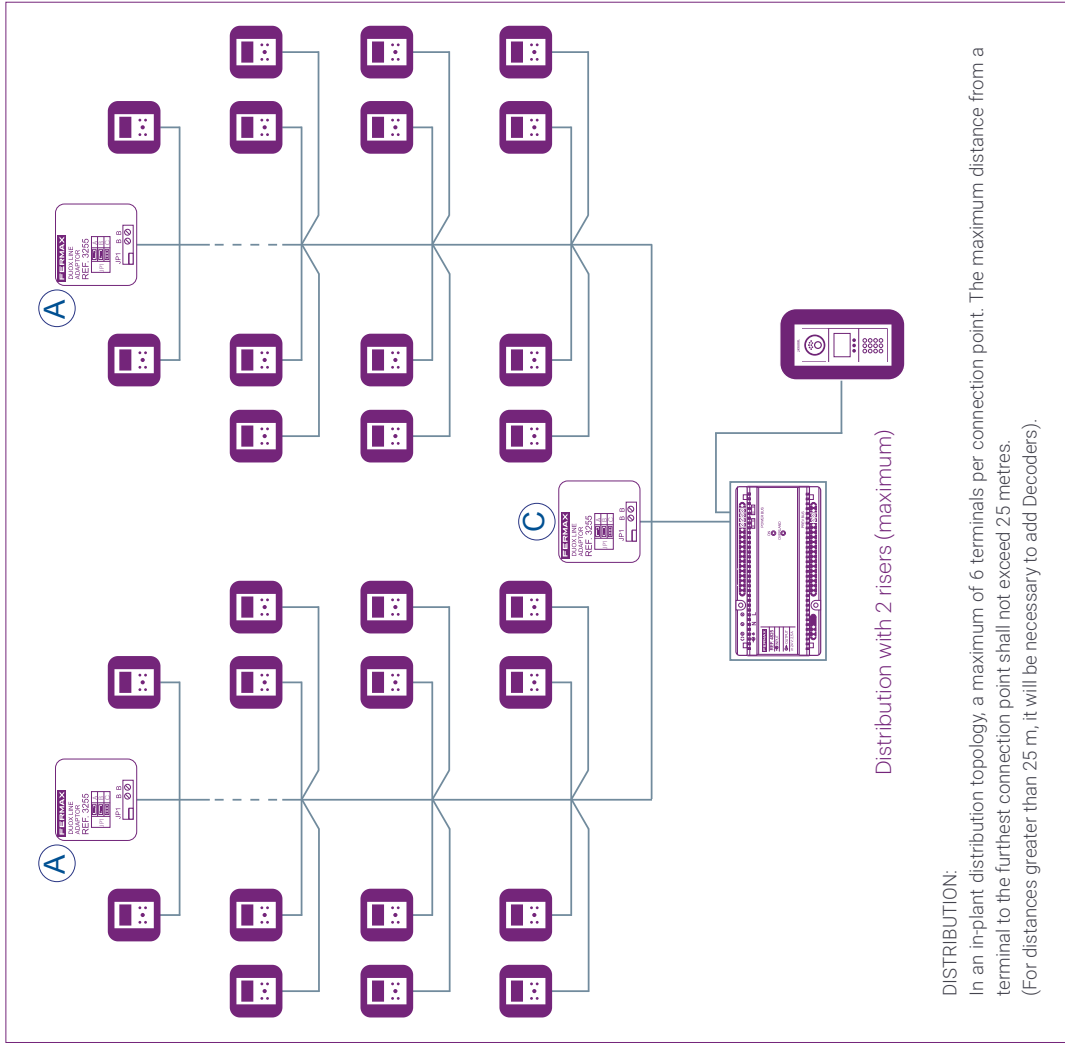

### MAXIMUM DISTANCE FROM THE OUTDOOR PANEL TO THE FIRST CONNECTION POINT

Cascade 1 riser	Cascade 2-4 risers	Star	Distribution 1 riser	Distribution 2 risers
55 m	25 m	30 m	55 m	35 m

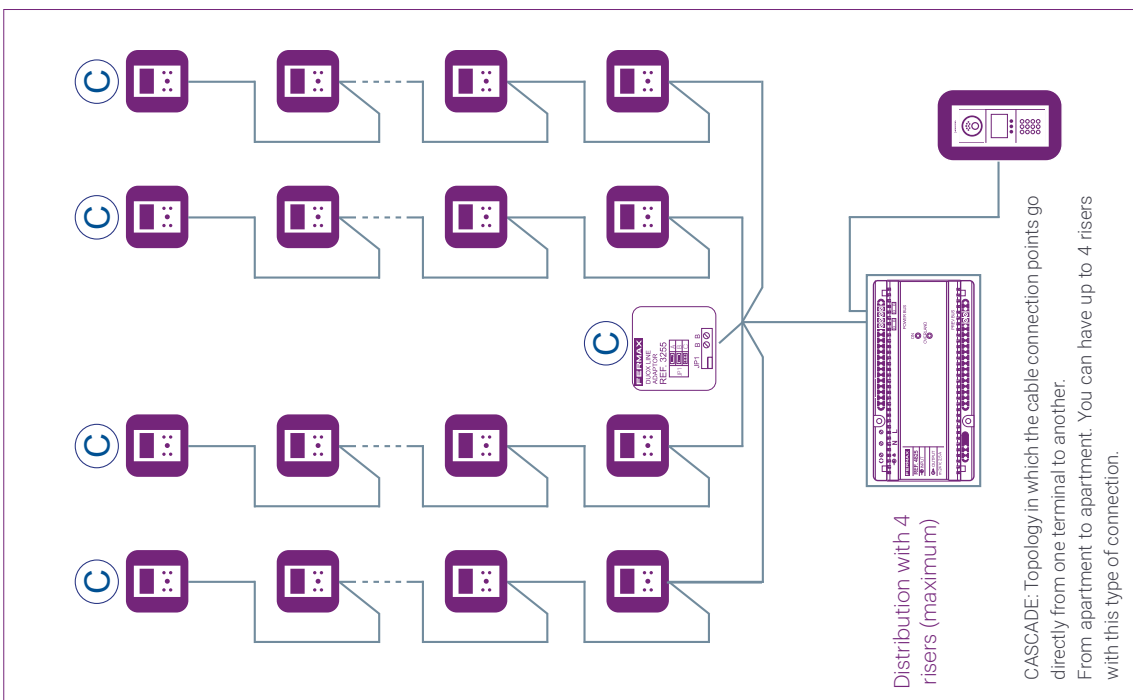

Distance between connection points: A minimum distance of 3 metres between different connection points is always recommended.

For more information about DUOX PLUS, see the technical books available at: <https://fermax.com/intl-en/documents>

Distribution with 2 risers (maximum)

**IMPORTANT:** it is recommended to power the electric lock release independently, whenever possible. It is also essential for AC electric strikes, for which the power supply ref. 4802 o ref. 4800 is recommended. If you wish to install a 12Vdc electric lock release without an additional power supply, we recommend the low consumption Fermax model ref. 29588.

**IMPORTANT:** it is recommended to power the electric lock release independently, whenever possible. It is also essential for AC electric strikes, for which the power supply ref. 4802 or ref. 4800 is recommended. If you wish to install a 12Vdc electric lock release without an additional power supply, we recommend the low consumption Fermax model ref. 29588.
