**MEMBER UPDATE: LETTER FROM CHAIRMAN MICHAEL DIAZ REGARDING COVID-19; IMPACT ON 2020 MEETING / EVENTS**

June 17, 2020

Dear members,

As life is starting to come back to “normal” and the 2019-2020 meeting season comes to an end, the ASNT-San Diego Section Board of Directors is continuing suspension of monthly meetings in 2020 given the health concerns for large gatherings and a possible resurgence of the virus in the fall, until further notice.

We will continue to monitor existing and ongoing COVID-19 recovery requirements established by the State of California; the California Department of Public Health; and County and local agencies as it continues to impact our industry significantly. I encourage you to check out the ASNT ISC website, asnt.org which offers relevant information for professionals to understand the impact the pandemic has had on the industry.

On behalf of the ASNT – San Diego Section Board of Directors, I would like to say we miss you and we look forward to seeing you all at an event sometime soon. Until then, wash your hands, wear your masks and stay safe!

Sincerely,

Michael Diaz
Chairman
ASNT San Diego Section

Look for upcoming notices of the next Section Meeting on the website and letters being sent to membership.
Dear San Diego, ASNT Members and associates.

The time has come for Larry and Sarah Olsen to step back from the San Diego ASNT Section activities and move forward to a new chapter in our lives. We will be leaving the San Diego area and moving to Elkhorn, Nebraska.

Sarah has been retired from the school district, and for myself I will continue to work for a short time but will ease into retirement. We will miss the San Diego area, our SD-ASNT family and all of the friends we have made in the ASNT community.

I have gained immeasurable knowledge and experience from a huge variety of personalities over the years working for and supporting the San Diego Section. I have honed my leadership skills taking from those who have served ASNT before me as well as working with the greatest slate of San Diego Leaders.

I will be maintaining my ASNT Lifetime membership with the San Diego Section. At this time, we would like to thank each and every person who have served with us on the San Diego Board of Directors with for their support and service to the society and San Diego Section.

We wish the San Diego Section well in the future.
Larry and Sarah Olsen

Our first student is Mr. Francisco Catanzaro. He is a Junior from Cathedral Catholic High School. His advisor is Marjan Rafie. The title of his project is “Determining Plastics with a Grating Spectrometer”. Optical spectroscopic techniques offer accurate ways of identifying plastics. The use of spectrometers creates significant advantages for determining the identity of plastics and mixtures in the plastic. Using a spectrometer also uses fewer materials to test the object, and can be tested from afar without the need for chemical vats or other labor-intensive sorting methods. Infrared (IR) spectroscopy is well suited to the analysis of polymer materials such as common household plastics like polypropylene. The intent of this project is to determine if a diffraction grating spectrometer is able to detect the differences between plastics. I believe that the diffraction grating spectrometer will be able to distinguish between different varieties of plastics and be able to successfully determine the polymer composition of a plastic to distinguish recyclable plastics from non-reusable plastics.

Our next student is Mr. Nathan McKinney. He is an Eighth grader at Good Shepherd Catholic School. His advisor is Mary Anne McNeil. The title of his project is “Mapping the Field of an Electromagnet”. Five different electromagnets were constructed with coiled copper wire: two circular, one rectangular, one figure-8, and one circular electromagnet with equal numbers of clockwise and counterclockwise turns. All magnets were constructed with 10 turns, excepting one circular magnet with twenty. Voltage applied to each electromagnet induces a current which in turn generates a magnetic field. This magnetic field can then be measured in two ways. The first is sprinkling iron filings onto a paper elevated above the electromagnet. The iron filings will align along the magnetic field lines and create a picture of the magnetic field. The second way is to attach a permanent neodymium magnet to an electronic scale.
San Diego’s Metorious Service Award
The San Diego Award was established 1998-1999. Award for Outstanding Meritorious Service was established to recognize those people in the San Diego Section who have bettered the Section over the Society by working to encourage others to reach goals they may have otherwise not sought, and to offer the rest of the San Diego membership an example of what they could be accomplishing by acting as Mentors within the Section. Note: Cannot be current Chairman of the San Diego Section.

Contact the Awards Committee Chair: Hans Weber or any San Diego Section BOD member for further information on how to nominate any individual by 30 June 2020.

Please note: All nominees must be nominated by a San Diego Section Member 500 hundred words or less. San Diego Section-ASNT’s goal is to recognize the individual member who has taken the NDT/NDE career path and is dedicated to making the world a safer place. Please help to encourage our fellow SD-ASNT members by nominating someone!

Officers and Directors 2020-2021
The San Diego Section Board is Announcing the officers and directors-at-large for the 2020-2021 year.
