

Case Study: Transforming Talent Acquisition & Training for a Leading Healthcare IT Organization

613 LOGISTICS AND MANAGEMENT LLC

Client Overview

A national healthcare provider sought to implement a new Electronic Health Record (EHR) system across multiple facilities. The initiative required highly skilled Healthcare IT professionals, clinical trainers, and change management experts to ensure smooth adoption and compliance.

Challenges

Urgent need for specialized IT professionals

The client required IT professionals with specific EHR expertise to implement their new system.

Limited internal resources

The organization lacked sufficient resources for developing role-based training programs.

High risk of operational disruption

System transition posed significant risks to ongoing healthcare operations.

Need for measurable outcomes

The client required clear metrics for adoption and compliance success.

Our Approach

Strategic Staffing

Leveraging our deep network in **Healthcare IT**, we sourced and placed top-tier professionals including EHR analysts, clinical trainers, and project managers.

Instructional Design & Training

We designed and delivered customized, **outcome-driven training programs** to ensure end-user competency. Training included:

- Role-based EHR adoption modules
- Compliance and data security awareness
- On-demand microlearning resources for continued support

Consulting for Impact

Our team provided **change management and project governance**, reducing resistance and accelerating user adoption. Additionally, we offered **clinical data abstraction** support to ensure seamless data migration and reporting accuracy.
