

Sinisana Technologies

Supply chain digital transformation through blockchain

Better supply chains through trust & transparency

SINISANA

Sinisana Technologies began operations in 2019. Based in Malaysia, Sinisana was co-founded by supply chain expert Gary D'Agostino and technologist Jonah Lau to use blockchain technology to make better supply chains through trust & transparency.

We focus on helping companies gain consumer mindshare through improving compliance towards food safety, fraud prevention, sustainability, and responsible sourcing.

Sinisana is an Alliance Partner of Ant Group since July 2020.

Gary D'Agostino

Co-Founder & CEO

Successful business builder with expert knowledge of all supply chain functions, strategic planning, negotiation, as well as business development.

Directly responsible for building multiple food brands which were eventually acquired for >\$100m USD.

Set up international partnerships in China, Thailand, Indonesia, and Korea with annual trading volume exceeding \$100m USD in canned and packaged food items.

Jonah Lau

Co-Founder & CTO

Deeply-experienced technology entrepreneur. Ex-Accenture & Ex-Cuscapi CTO.

Designed & created multiple tech platforms for telco, automotive, and F&B industries with clientele across the Asia Pacific region.

Managed R&D centers in multiple countries & cultures.

Notable successful projects for McDonald's AP, YUM SEA, Maxim's HK, Jollibee PH, and multiple automotive companies in Malaysia (Hyundai, KIA, Proton, etc.)

Clients we have served prior to Sinisana

SANMINA

a cooperative of family farms since 1893™

How we help our clients

Gain consumer mindshare

Food safety compliance

Fraud prevention

Sustainability compliance

Responsible sourcing

Key Products

Intersect by Sinisana

Supply chain management system built on blockchain technology. The system focuses on delivering compliance, traceability, and oversight functionalities to various parties within the supply chain. Tools and integrations available to support different digital maturity levels, particularly in emerging economies.

Through Intersect by Sinisana, supply chain participants can raise the bar for the confidence-level that their customers can be assured of via trust & transparency on the blockchain.

Trade Manager

Order management & fulfillment built for global trade based on blockchain. Provide complete details of your offshore orders through the production process.

Monitor production and inventory levels in real-time at your supplier's facilities to minimize supply disruptions.

Our solution can be integrated into existing ERPs or utilized as a stand-alone solution for those partners needing a nudge to enter the digital era.

A single platform to support the entire production and fulfillment process

Case Study

Digital Transformation

Transforming manual paper-based operations at hatchery, farms and processing facilities into online real-time based management operations and reporting.

Sustainability

Help prove their claim that their crabs are 100% farmed in a sustainable manner. Their Australian customers have offered to pay more for crabs that can be PROVEN to be farmed sustainably.

Fulfill Export Market Requirements

Integrate and manage export requirements such as HACCP, traceability and product recalls.
Manage global orders through digital platform.
