

Roof Spray Foam & Silicone Coatings

GreenSeal 2.5, 2.8 & 3.0

GreenSeal HFO is a closed-cell, HFO-blown spray polyurethane foam (SPF) roofing system that delivers high R-values, seamless insulation, and exceptional wind uplift resistance. Its self-flashing, closed-cell design ensures a durable and leak-resistant roof.

GreenSil 100

GreenSil 100 is a single-component, moisture-cured, fluid-applied silicone coating that is specially formulated to meet low-VOC requirements.

High Solids, Low VOC Silicone Coating
93% solids by Volume

Available in White, Gray, and Tan
(5gal pail or 55gal drum)

GreenSil FG

GreenSil FG is a single-component, high-build silicone mastic that cures to form a durable, weatherproof seal. It's designed for Ultratite silicone roofing systems to seal and protect penetrations, seams, fasteners, and other roofing surfaces.

Available in White and Gray
(2gal or 5gal pail)

Acrylic Coatings (Available in 5 gal pails or 55gal drums)

GreenCoat FG

GreenCoat FG is a single-component, acrylic, water-based mastic. This product is intended for use as a flashing material for most substrates and a sealer for seams, fasteners, penetrations, and other details in roof coating applications. GreenCoat FG can be used to fill in small cracks and alligatored asphaltic roof surfaces.

GreenCoat

GreenCoat is a 100% acrylic, water-based elastomeric coating for roofs, walls, masonry, and SPF systems, offering durable waterproofing and weather protection. (55% solids)

Available in White, Gray, and Tan

GreenCoat FS

GreenCoat FS is a fast-skinning, 100% acrylic, water-based elastomeric coating that prevents wash-off before curing. It provides durable waterproofing and weather protection for roofs, walls, masonry, and SPF systems. (55% solids)

Available in White, Gray, and Tan

Primers (Available in 5 gal pails or 55gal drums)

GreenPrime BB

GreenPrime BB is a low-VOC, water-based primer that blocks bleed-through from asphaltic substrates, enhances coating adhesion, and resists heat, moisture, and weathering.

GreenPrime GP

GreenPrime GP is a single-component, water-based acrylic primer that provides strong adhesion to BUR, metal, concrete, wood, SPF, and masonry. It can be sprayed, rolled, or brushed and temporarily protects SPF from UV exposure.

GreenPrime SP

Greenprime SP is a high-quality, plasticizer-free, single-component, water-based acrylic primer for spray, brush, or roller application. It's designed for use on PVC, Hypalon, and aged TPO membranes, providing strong adhesion and preventing plasticizer migration that can cause discoloration or premature coating failure. SP creates an ideal surface for applying acrylic and 100% solids silicone coatings.

GreenPrime Metal

GreenPrime metal is used as a prime coat over metal surfaces but can also be applied to a wide range of substrates including wood, metal, concrete, masonry, various single ply membranes, spray polyurethane foam and most commonly used roof coatings. A high quality, water-based, rust inhibiting, low VOC primer.

Sealant (Available in 2 gal pails)

UltraPatch WetFix

This plasticizer-free urethane/silicone hybrid sealant delivers superior adhesion, flexibility, and waterproof performance—even in wet or freezing conditions. It self-levels for seams, fasteners, and penetrations, adheres to damp surfaces and silicones, and cures to a durable, UV- and mildew-resistant finish. Available in White and Gray, it's VOC compliant and ideal for industrial applications.
