

Wall Foam

Ultratite 50 OC

Ultratite 50 OC (no mix) is a two-component, open-cell, water-blown polyurethane foam with low in-place density and excellent adhesion to various substrates. It meets the intent of ICC residential and commercial building codes for spray foam insulation.

Ultratite 2000

Ultratite 2000 is a two-component, closed-cell polyurethane foam that uses an HFO zero-ozone-depleting blowing agent with a low (<1) global warming potential. It enhances building envelope performance and offers excellent self-adhering properties for use on a variety of substrates.

Services Offered (At no cost when using Ultratite Spray Foam)
