

C³ Cybersecurity Assessment

Your Blueprint for Cybersecurity Strategy, Cybersecurity Protection, and Cybersecurity Resilience

At **CISOnow**, we've developed the proprietary **C³ Cybersecurity Assessment** to revolutionize cybersecurity program evaluations. Built on three essential pillars - **Cybersecurity Strategy, Cybersecurity Protection, and Cybersecurity Resilience** - the **C³ Security Assessment** provides organizations with a clear, actionable roadmap to cybersecurity program maturity.

Unlike traditional assessments, the **C³ Cybersecurity Assessment** is modular, allowing organizations to tailor the assessment based on their specific needs, ensuring a focused and actionable approach.

What Sets Us Apart?

- **Proprietary Methodology:** The **C³ Cybersecurity Assessment** is unique to CISOnow, offering insights beyond standard evaluations.
- **Industry Expertise:** Backed by a seasoned team of cybersecurity professionals with experience across multiple industries.
- **Action-Oriented Results:** Our reports focus on actionable solutions, not just identifying problems.

KEY BENEFITS

Clarity: Gain deep visibility into risks.

Confidence: Act with strategic certainty.

Control: Take proactive cybersecurity steps.

Resilience: Strengthen defenses against threats.

Ready to transform your cybersecurity program? Contact us today to schedule your **C³ Security Assessment**.

Go Beyond Traditional Assessments

Unlike traditional security assessments, such as NIST CSF, that focus solely on whether capabilities are in place, the **C³ Security Assessment** dives deeper. Our methodology not only evaluates the existence of cybersecurity controls but also examines their configurations and effectiveness.

By going beyond a simple checklist approach, we ensure that your systems are not just compliant but optimally configured to mitigate risks and support your organizational goals. With C³, you gain actionable insights and a clear roadmap to strengthen your cybersecurity posture at every level.

Key Features of the C³ Security Assessment

- **Customized Roadmaps:** Tailored recommendations to align with your organization's unique business objectives and risk tolerance.
- **Comprehensive Coverage:** In-depth evaluation of cybersecurity frameworks, policies, processes, and technologies.
- **Prioritized Action Plans:** Clear, step-by-step guidance for addressing critical vulnerabilities and strengthening defenses.
- **Framework Agnostic:** Works seamlessly with NIST CSF, ISO 27001, CIS Controls, and other industry standards.

How the C³ Security Assessment Works

1. **Discovery Phase:** In-depth interviews and data collection to understand your current cybersecurity posture.
2. **Gap Analysis:** Identification of critical gaps in strategy, protection, and resilience.
3. **Actionable Roadmap:** Delivery of a tailored plan with clear priorities and milestones.
4. **Implementation Support:** Ongoing collaboration to ensure successful execution of recommendations.

Why choose CISONow?

Tailored, Industry-Specific Solutions

Experienced Cybersecurity Professionals

Comprehensive, Holistic Approach

Efficient, Action-Oriented Methodology

Regulatory compliance and risk management experts

Client-Centric and Results-Driven Focus

Clear Roadmaps, Measurable Outcomes

Ready to transform your cybersecurity program? Contact us today to schedule your C³ Security Assessment.
