

# Targeted Security Assessments

Focused on high-risk areas that attackers exploit

## Targeted Security Assessments

CISOnow has developed security assessments that specifically target high-risk areas frequently exploited by attackers. Additionally, our assessments pinpoint program deficiencies that are most likely to result in data breaches.

### Areas of Focus

- Cyber Security Program Assessment
- Cloud Security Posture Assessment
- Active Directory / Entra ID Assessment
- Ransomware Readiness Assessment
- Incident Response Assessment
- Breach Response Assessment
- Attack Surface Assessment
- Dark Web Assessment
- VMware vSphere Security Assessment
- Purple Team Assessments
- Compliance Readiness Assessment (PCI, HIPAA, ISO, SOX, SOC)

### Why targeted security assessments?

Quickly pinpoint gaps in your current cyber security program

Focuses on high-risk areas often exploited by attackers

Identify high-risk deficiencies in your current security posture

## Incident Preparedness

### Incident Response Plan Review

- Are you prepared to respond to an incident?
- Do you have a plan defined with roles and responsibilities?

### Purple Team Exercises

- Have you tested your tools and capabilities are working as expected?
- Are you alerting on the latest tactics and techniques from attackers?

### Table Top Exercises

- Have you tested your current incident response plans?
- Is your organization aligned on roles and responsibilities?

### Cyber Insurance Review

- Does your organization have cyber insurance?
- Does your cyber insurance adequately cover you when an incident occurs?
