

Virtual CISO (vCISO) Services

Align cyber security best practices to your organizational goals

CISOnow is a leading Virtual Chief Information Security Officer (vCISO) services provider dedicated to helping organizations strengthen their cyber security posture. Our team of seasoned experts provide strategic guidance, risk management, and tailored solutions to address the evolving cyber security challenges in today's dynamic business environment.

Each vCISO engagement begins with a Preliminary Security Assessment (PSA). This assessment swiftly pinpoints high-risk areas within your cyber security program, evaluating it against industry-recognized standards and best practices.

The final deliverable includes an executive summary, your current cyber security maturity score, and a comprehensive action plan to address the identified high-risk areas of your cyber security program.

KEY BENEFITS

A trusted cyber security partner and advisor

Industry recognized security leaders and experts

Flexible service offerings to meet your needs

Holistic approach to assessing security program maturity

Our 4 Step Process

1

Assessment

We assess your environment and gather information

2

Strategy

We formulate a short-term and long-term strategy

3

Execute

We execute the strategy and quickly address critical findings

4

Oversight

We become your trusted advisor and part of your team

Targeted Security Assessments

CISOnow has developed security assessments that specifically target high-risk areas frequently exploited by attackers. Additionally, our assessments pinpoint program deficiencies that are most likely to result in data breaches.

Areas of Focus

- Attack Surface Assessment
- Cloud Security Posture Assessment
- Ransomware Readiness Assessment
- Incident Response Assessment
- Breach Response Assessment
- Dark Web Assessment
- VMware vSphere Security Assessment
- Purple Team Assessments
- Compliance Readiness Assessment (PCI, HIPAA, ISO, SOX, SOC)

What do assessments achieve?

Quickly pinpoint gaps in your current cyber security program

Focuses on high-risk areas often leveraged by attackers

Identify high-risk deficiencies in your current security posture

Incident Preparedness

CISOnow specializes in equipping cyber security teams and organizations to respond promptly and effectively to security incidents. Our experts work closely with your security team and leaders to prepare and test your incident response readiness.

Incident Response Plan Review

- Are you prepared to respond to an incident?
- Do you have a plan defined with roles and responsibilities?

Purple Team Exercises

- Have you tested your tools and capabilities are working as expected?
- Are you alerting on the latest tactics and techniques from attackers?

Table Top Exercises

- Have you tested your current incident response plans?
- Is your organization aligned on roles and responsibilities?

Cyber Insurance Review

- Does your organization have cyber insurance?
- Does your cyber insurance adequately cover you when an incident occurs?
