

## Engineered Solutions for H<sub>2</sub>S & Mercaptans Removal from Gas Streams

SulfurSWEET® team brings 60+ years of cumulative global experience, superior technical support, and technology to take on your H<sub>2</sub>S and Mercaptans challenges delivering effective solutions with unique flexibility, responsiveness, and adaptability. We bring intelligent chemistry solutions, turn-key systems and innovation into the field of H<sub>2</sub>S and Mercaptans removal.

SulfurSWEET systems are designed to work in remote applications including extreme cold. climates. The systems provide consistent and reliable production of gas that meets specifications for H<sub>2</sub>S using online monitoring and control to ensures optimal scavenger utilization. SulfurSWEET systems are designed to meet the rigid safety standards, including ASME codes and B31.3. The simplified design minimizes the operational personnel requirements and ensures that chemicals are not released from the closed process system. Each SulfurSWEET system includes installation, startup, training and technical support.

### Technical Services

- Consulting
- Testing
- Onsite Troubleshooting
- Technical Training
- Systems Designs
- Start-up Support

### Chemical Technologies

- Liquid Chemistries
  - H<sub>2</sub>S Removal
  - Mercaptans Removal
  - Amine-based
  - Non-Amine based
- Solids Chemistries
  - H<sub>2</sub>S Removal
  - Mercaptans Removal
  - Iron-based
  - Non iron-based & non-pyrophoric

### Complete Systems

- Bubble Towers
- Scrubbers
- Pipeline Injection System
- Custom Systems
- New and Repurposed Systems
- Replacement Vessels
