Workshops (\$400) and Trunk show (\$300)

All day workshops (6 hours) \$400 + expenses. Maximum number of students 25, if more than 25 signup it is an additional \$25 per student.

More than 1 workshop can be taught, discounts are given if more than 1 workshop is requested.

Expenses can be 1 or all listed: airfare, hotel, rental car and/or mileage. The guild is responsible for these costs. All reservations, whether it be airfare, hotel, rental car, will be reimbursed immediately when booked by me.

FYI: I prefer to drive.

The Guild is responsible for mileage from my home: 10527 Hills Lane Dr, Goodrich, MI to hotel/guild meeting/workshop. If the guild prefers to make the reservations, please keep in mind that I will need to arrive the day before not the day of. If the guild is within 60 miles of Goodrich, MI no lodging will be required, just reimbursement of mileage. In case of inclement weather, then the guild would have to provide lodging for the extra day that was not scheduled.

A list of supplies needed will be sent via email to shop owner or guild program director for students. For my trunk show I will need at least 3 tables for the quilts and 2-4 quilters to handle the quilts. Also 1 table for sale patterns.

My Trunk show is titled: What was I thinking?! My trunk show presentation is fun! I talk with my audience and get them involved! I tell as many funny stories as I can that relate to the quilts to keep the audience (the quilters) involved.

Trunk show: Yes ___ No ___ Fee \$300

Workshop

Fee \$400

List workshop(s) you would like:

1) _____

2) _____

Workshops:

1. Happy New Year quilt: precuts can be used. The quilt begins by making the center star and works out to the final border. The skill for this quilt is having that pieced border fit! We all know that most of us don't like working on pieced borders.

88 x 88

2. Woven Stars, is not a traditionally pieced quilt and there are left over pieces of fabric from the technique. What to do with the leftover pieces? Add them to your scraps and save them for a scrappy quilt, give them away to a fellow quilter who LOVES making scrappy quilts or give them to someone who makes dog beds. They can use the scraps for the stuffing of the beds.

Attaching images of both quilts

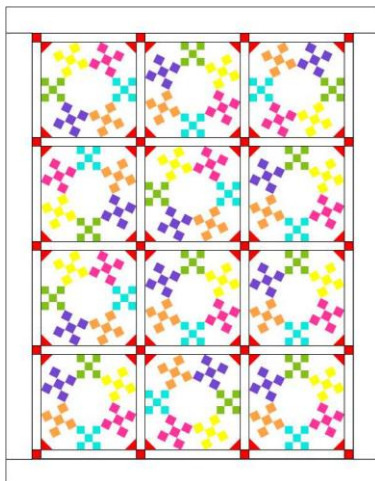

3. Compass Star: Compass appears to need Y seams. It does NOT! How cool is that! I have a technique that eliminates the Y seam. All Easy piecing too. For the Star points (look like diamonds or kites) I use 2.5" strips. This pattern is not on my website at this time (Jan/2022)

During class time, I like to gather everyone together and talk about the different ways to play with the block's components. Templates will be included with the pattern. My templates do NOT slip. Also, there are two layouts, one with cornerstones forming a secondary design and one without, everyone can choose what they would prefer.

4. Rock Around the Block is a modern version of Jack's Chain. Again, the Y seams have been eliminated. I have a template that comes with the pattern for workshop's students. The template will NOT slide and makes life so easy when making this quilt. After most everyone attending the workshop gets at least one block done, we gather, collect the finished blocks and begin playing with them on the floor or on a table surface.

5. Peaks and Valleys: Learn to make 3 different types of Log Cabin quilt blocks. Skill: no more wobbly blocks! Peaks and Valleys is a published pattern you can find in Quilter's World magazine Spring 2022.

6. Snowflake Feathered Star: I redesigned the traditional Feathered Star block. Took out all the difficult parts like Y seams and partial seams...and designed it so that a quilter who has only made a few quilts can conquer this classic block. Snowflake Feathered Star is the center of my Sampler BOM quilt "Snowflake Feathered Star Sampler Quilt" that is a king size quilt. Snowflake Feathered Star is a stand-alone pattern. Snowflake Feathered Star is surrounded by a Double Flying Geese border, that I also made the construction very easy.

Quilt size: 66" x 72"

Kits are available for a limited time and

Are not required for the class.

Kit fee with pattern \$125

6. Twirly Thingamajig: (gotta love that name!) is a fun play on the pinwheel. This pattern reminds me of when I was child playing with the pinwheels/whirligigs on a stick. As they would spin around you could see all the beautiful colors shinning in the sun and spinning round and round while I was holding on to the stick running through the yard. Twirly Thingamajig is raw edge machine applique. This is a perfect project for a anyone wanting to learn applique. In class we will make 3 different Twirly blocks, learn how to use different stitches to secure the applique shapes, mark the block for quilting lines, use our walking foot for machine quilting, free motion quilting, and ruler work.

Machine Feet required: open toe, walking foot, ruler foot and free motion foot.
