Introducing the Northeast's top-tier manufacturer of waste handling equipment! Though our name is fresh, we bring over 50 years of unparalleled experience in the waste industry. Trust us to deliver cutting-edge solutions infused with a legacy of expertise.

Built for Real Work

Elite Containers delivers industrial-grade roll-off containers engineered for durability, safety, and long service life. Though our name is new, our team brings decades of experience in waste equipment manufacturing. We use high-strength steel, proven designs, and consistent quality control to produce containers that perform on construction sites, transfer stations, cleanouts, and industrial applications.

We put our best effort in every build.

EliteContainerSales.com

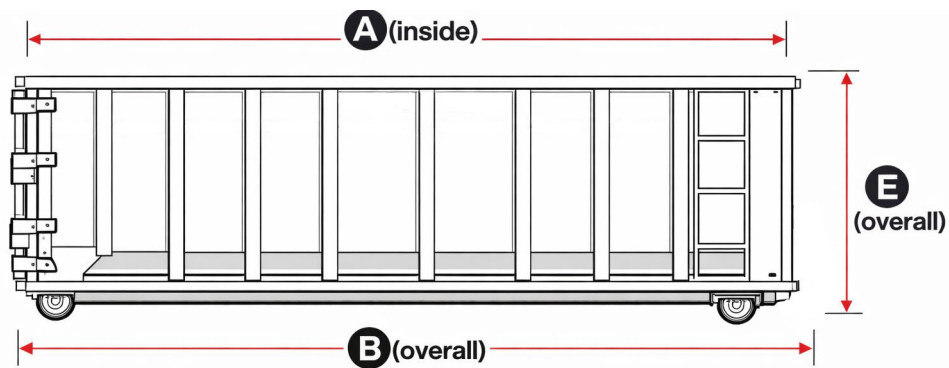

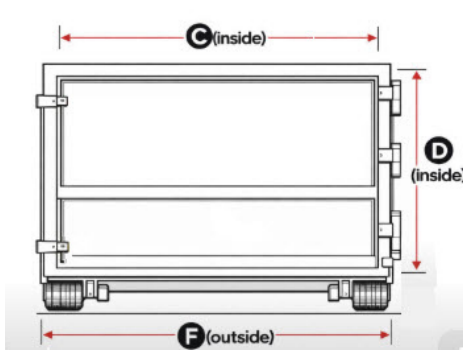

- Why Elite?
- Heavy-duty materials and reinforced stress areas
- ANSI-compliant vertical lift handle designs
- Fast lead times and competitive pricing
- Built in Connecticut by experienced fabricators
- Custom builds available

Rectangular – Style Roll-Offs

Built with precision craftsmanship, Elite Containers' rectangular open-top roll-offs combine heavy-duty performance with superior build quality. ANSI-certified and dimensionally standardized for haulers, each container reflects our commitment to safety, strength, and long-term value.

Built Strong. Designed Smarter. Backed by Experience.

At Elite Containers, we don't believe in cutting corners — we believe in building containers that outlast and outperform in the real world. Every Elite Roll-Off is manufactured with:

- **Oversized Side Posts for Superior Wall Strength:**

Industry-leading 3" x 9" side posts with 4-way bends provide maximum side wall reinforcement and structural integrity, even under heavy loads.

- **Dual Weep Hole Draining System:**

Relocated weep holes on both sides of each post improve airflow and drainage, reducing moisture buildup during hauling.

- **Precision Vertical Lift Lock System:**

ANSI-compliant vertical lift locking system with enclosed guide track improves operator safety and reduces risk of handle damage during transport and dumping.

- **Full-Length Continuous Welded Seams:**

All main seams are fully welded for strength and long-term durability.

- **Heavy-Wheels:**

8" x 10" heavy-duty wheels for reliable rolling and long service life under frequent loading/unloading.

- **Heavy-Gauge Floor and Rails:**

Multiple duty configurations available — from 7ga to 1/4" floors, and main rails built to handle severe-duty applications.

- **Reinforced Rail Gussets:**

Heavy-gauge gussets reinforce rail-to-floor connections for added structural stability under heavy loads.

- **One-Piece Front Sheet Construction:**

Formed front sheets minimize seams and stress points, improving strength at critical load areas.
