

FRONT LOAD CONTAINERS

ELITE CONTAINERS

PROUDLY MANUFACTURING WASTE
HANDLING EQUIPMENT

211 BROOKSIDE RD WATERBURY, CT 06708

Call: 203-456-8811 or

Fax: 475-235-6149

Ideal for :

- Municipalities
- Restaurants
- Drug Stores
- Strip Malls
- Shopping Centers

Elite Containers' front -load containers are engineered to perform in high-traffic, high-demand environments—from restaurants and retail centers to municipalities and commercial properties. These containers are built to handle repeated pickups, heavy loads, and tough conditions without sacrificing safety or reliability.

Each front-load container is constructed using heavy-gauge steel, reinforced channel structures, and precision-formed components to ensure superior strength and long-term durability. Our containers are fully primed on the interior, exterior, and underside for enhanced corrosion resistance—extending service life and protecting your investment.

Whether you need compact footprints or high-capacity solutions, Elite Containers offers a full range of rear-load sizes and profiles to match your operational needs.

We put our best effort in every build.

FRONT LOAD CONTAINER SPECIFICATIONS

At Elite Containers, durability is our standard. Our Front Load Containers are manufactured to deliver superior performance in demanding environments. From restaurants and retail centers to municipalities and apartment complexes, every container is crafted from heavy-gauge steel with fully welded seams and reinforced channels.

The result is a container designed for daily use, long service life, and maximum reliability.

FEATURES

- **Heavy Gauge Steel Construction:** 10-12-gauge floors with 12ga fronts, backs, and sides on all sizes to maximum strength and durability.
- **Interlocked Channel Design:** Precision-formed 1.5" x 3" interlocked channels strengthen the body and support the top crown, ensuring long-term resistance to heavy use.
- **Protective Finish:** Industrial-grade primer and coating applied on all surfaces to guard against rust, moisture, and harsh weather.
- **Continuous Weld Construction:** Fully welded seams at every stress point create a stronger, leak-resistant container structure that maximizes durability and extends service life.
- **ANSI-Compliant Standards:** Manufactured to ANSI safety and dimensional specifications for seamless hauler compatibility.
- **Heavy-Duty Pockets & Runners:** Fully welded 7-gauge fork pockets with gusset support and reinforced 10-gauge runners allow for secure lifting and operator confidence.
- **Heavy-Duty Bumper Protection:** All Elite front load models are equipped with reinforced bumper pads engineered to absorb impact and guard against frontal damage, ensuring longer container life and reduced maintenance.
- **Customization & Built-to-Spec:** Available in multiple sizes (2YD to 10YD) and profiles (slant or high), our front load containers are built to order with a wide range of options — including floor and wall thickness, quick-release casters, caster pads, manual or automatic lid locks, lid rests, plastic or steel lids, side-access doors, fork pocket configurations, and custom paint to match your fleet — ensuring every container is tailored to your operation.
