

OUR MATERIALS

We use a range of renewable or recycled materials to make our packaging.

All of these materials are compostable, which means they'll break down in commercial composting facilities in less than 12 weeks.

Talk to us about the best solution for your food and packaging waste.

www.vegware.com

RCPLA

Recycled high heat plant-based PLA. 89% less carbon than plastic and 42% less carbon than new PLA.

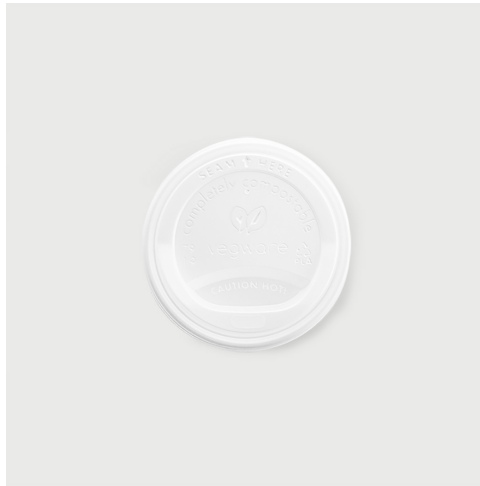

PLA LINING

Plant-based PLA lining. 72% less carbon than plastic.

ECO PAPER & CARD

Sustainably sourced or recycled card and paper.

CPLA

High heat plant-based PLA with 67% less carbon than plastic.

BAGASSE

Bagasse is a stylish eco alternative to polystyrene made from recycled sugarcane fibre, with 99% less carbon.

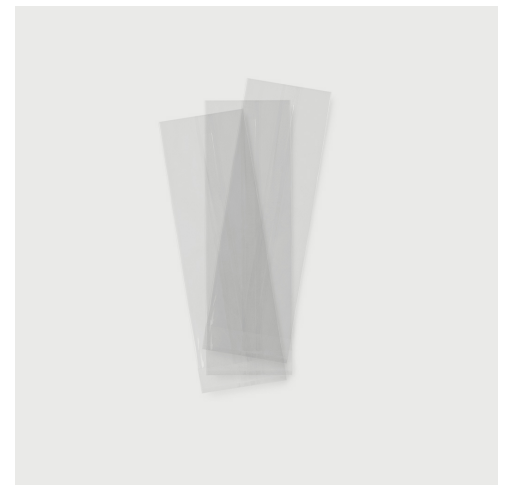

PLANT-BASED PLA

Plant-based PLA contains less embodied carbon than oil-based PET plastic.

PALM LEAF

Fallen areca nut palm leaves gathered from the forest floor in Kerala and hand-pressed in spring water.

NATUREFLEX

Clear, heat sealable and home compostable film made from wood pulp.
