

2025 Rules Bulletin

- **Effective for all Thunder Hill Speedway associated kart classes.**
- No wheel travel permitted of any kind. Axle and spindles must be solid mounted. Hubs on rear axle must have a key installed and be securely tightened to the axle. Wheel/Hub cannot free spin and cannot “float” or move in any direction.
- All hardware that attaches the axle and spindles to the frame must be tight.
- No springs or shocks of any kind allowed to help limit travel of the wheels.
- Any infraction to this rule will result in an immediate DQ and no points will be awarded for the entire event.
