Chiba Neko (\$CHIBA) 360° review

Industry and Market Position

- CHIBA initially focuses on capturing the Web3, Discord, and Telegram communities, with plans to expand into the broader Web2 and Web3 services.
- The global translations industry was worth \$56.18 billion in 2021, indicating a significant market opportunity for CHIBA.

Trust and Community

- The CEO is fully doxxed and based in Europe, with a team that has experience building tech companies within Web3.
- CHIBA has a strong community base across all major social platforms, with an independent review scoring community trust at 96%. It has 815 token holders, 1500 vibrant Telegram members, and 1400 Twitter followers, including popular KOLs. The network covers key stakeholders in Asia, Europe, and the USA within the Web3 space.

Smart Contract and Security

- Independent Assure DeFi® has completed third-party KYC with the highest security category awarded.
- CHIBA was stealth-launched without VC or presale; this means no dilution/dump issues.
- Contract renounced and Liquidity pool locked with a current value of 20%.
- An independent project contract audit by DexTools gave CHIBA a perfect 99/99 score.
- EVM token built on the secure, scalable, popular and largest Blockchain, Ethereum.

Tokenomics

- 80% of profits go directly to token stakers, paid in ETH. Additionally, 15% of funds generated are allocated for strategic marketing initiatives, and 5% for regular buybacks.
- A 4% trading tax supports development, marketing, and liquidity.
- The fully diluted supply of 10,000,000 CHIBA tokens is in circulation.

CHIBA Features

- CHIBA is a pioneering platform that offers cross-platform language translation services, seamlessly uniting community language groups on Telegram and Discord. This allows all users to communicate in their native languages without translation delays.
- CHIBA provides services in 109 languages. It boasts 20,000 current users, an ultra-fast translation speed of 0.35 seconds, and has already translated 6 million words since its launch.
- The platform is fully operational on Discord and Telegram.

Expansion and Marketing

- CHIBA's Web3 customer base is rapidly expanding, with 13 official partners, including blue-chip projects like Vulcan Forged and Genso Meta. Discussions have also begun with \$1 billion+ projects.
- Onboarded Web3 marketing experts and advisors and is working with reputable and verified KOLs within the Web3 space.

Development

- Developing gaming and GameFi in-game chat services, a translation software API for integration into third-party applications, cross-platform integration, AI-cantered integration to improve translation quality is active, voice-to-text translation services, and a manga story development project based on the Chiba Neko character.
- Working towards getting \$CHIBA listed on major cryptocurrency exchanges to increase accessibility and liquidity.
