

# March 2023

March is Workplace Eye Safety Awareness month.

Flying objects, tools, particles, chemicals, and harmful radiation are the main causes of most eye injuries. In many cases, implementing safe work practices and utilizing appropriate personal protective equipment could prevent these injuries entirely.

Remember:

- ✦ Always wear the appropriate safety eyewear for your jobsite or role, even if you are just passing through a hazardous area.
- ✦ If you're working in an area with particles and/or dust, wear safety glasses with side shields to protect against flying objects.
- ✦ When working with chemicals, always wear safety goggles or face shields to protect against splashing.
- ✦ When working around hazardous radiation such as welding, lasers, or fibre optics, be sure to use special purpose safety goggles and helmets designed specifically for the task.
