

Coaching Parents to Deliver Therapy

We recognise that parents play the most important role in your child's lifelong learning.

Through our **Parent Coaching Program** you will learn the skills to engage your child in play and daily routines. This will empower you to promote your child's learning and support co-regulation across multiple settings.

This **Parent Coaching Program** is offered to all families through ESDM Training and is covered under your NDIS funding. This wonderful support for families is a 8-week self-paced program of pre-recorded webinars that you can do in your own time,

followed up each week with a live zoom face-to-face session with one of our Trainers to answer any questions you may have and discuss your progress and challenges as you work through the program. In these live zoom sessions, you can tell us the areas that you are needing most help with and we can coach you through those, in the moment.

This program enables you to increase the number of learning opportunities your child is getting, in the most natural way...in everyday moments, routines and family life with the people they love the most...their parents!

Cost: \$750 for the 8 pre-recorded Webinars or 8 weekly face-to-face zooms.
