While our proprietary sugarcane bagasse can be recycled, it also will fully decompose in 180 days in soil or water. No trees or wood is used in the production of these products.

According to the EPA in 2018, 80,000 tons of Styrofoam containers were generated and less than 5,000 tons were recycled. Plastic containers and packaging waste totaled 26.9 million tons. The Acorn East mission is a commitment to finding innovative and competitive alternatives to standard, single-use packaging.
