STEVE DEVRIES OWNER / SUPERVISOR AND LEAD INSTALLER

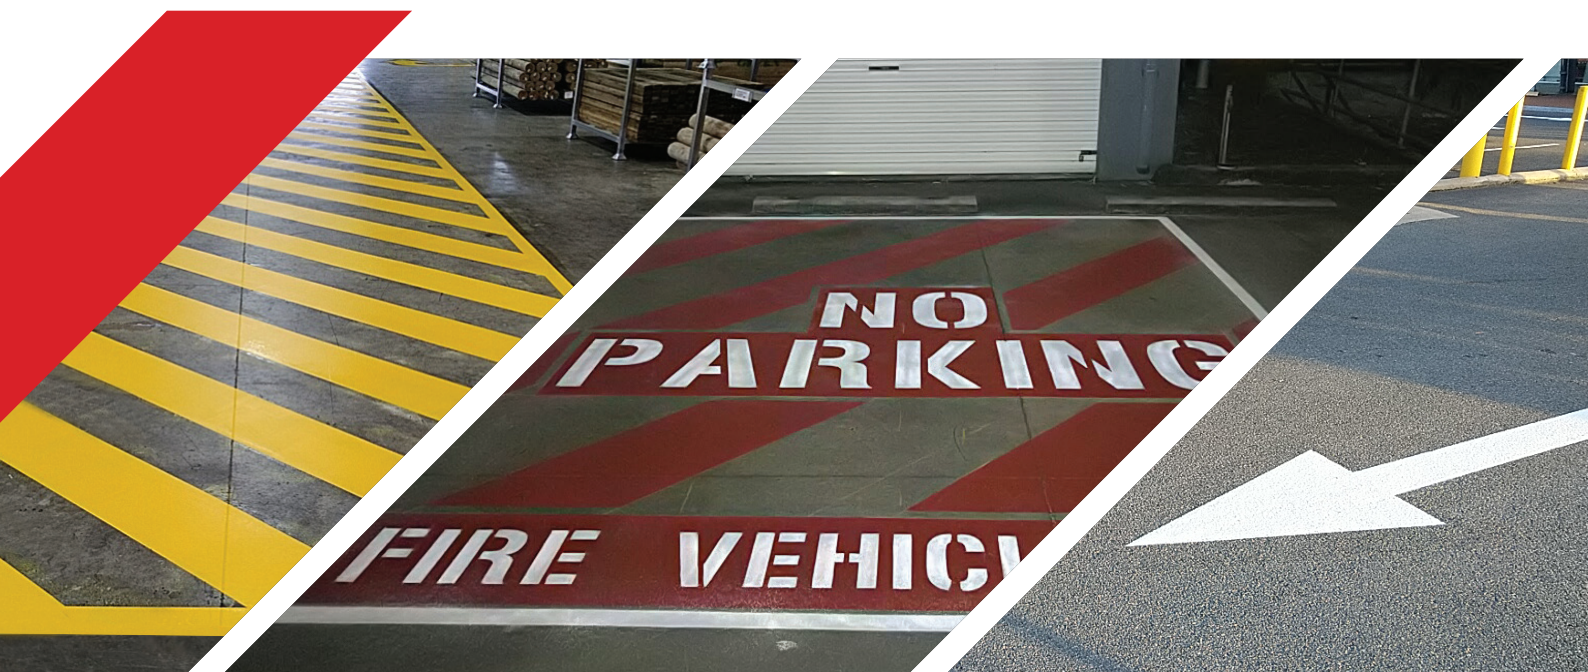

An experienced Operations Manager, Steve started D2E in 2009 and has over two decades industry experience with signage, line marking and safety products.

Steve is an entrepreneurial leader who balances problem solving with safety assurances. He has the ability to select and modify works on site to provide the best value for money for the client, whilst maintaining his standard of high-quality workmanship.

Fully trained in the application of line marking and a certified epoxy applicator, Steve is a preferred installer for Saferoads products—including speed humps, speed cushions, wheelstops and all other road calming and delineation devices.

Steve has demonstrated an ability to audit and manage customer assets within commercial properties, shopping centres and local government precincts.

A vast knowledge of Australian Standards ensures Steve is committed to always providing a professional and enthusiastic approach to his work. Steve takes pride in providing quality products and services, whilst maintaining and building client relationships to ensure adherence to legislation and standards of performance, quality, cost and safety are met.

LINE MARKING

WHY LINE MARK CARPARKS?

High flow of traffic and vehicles means carpark should be well organised and all lines visible and reflective.

The risk of collisions and road incidents is increased if a carpark lacks safety. Line marking makes a vast difference in the overall safety of a complex and leaves no room for confusion or concern.

Our efficient line marking team is equipped with all the equipment, knowledge and safety practises to complete a variety of jobs, including but not limited to:

- Carpark Lines, including custom carpark line marking, new carparks and also remarking and refreshing of existing lines
- Pedestrian Crossings
- Safety Lines
- Directional Arrows
- Symbols - Pram, Disabled, Bicycle
- Kerbing
- Speed Humps
- School Crossings
- Stop Lines
- Give Way Lines
- Numbering and Lettering
- Walkways
- Helipads

We also specialise in factories, warehouses, schools and can remove existing line markings if required.

CARPARK SAFETY

SPEED HUMPS

One of the best ways to slow traffic and vehicles is the installation of rubber Speed Humps on roads and in car parks.

METAL – 100-TONNE RATED

If additional durability is needed, then the extra-strong steel construction of Metal Speed Humps makes them perfect for high traffic areas like shopping centres, car parks and industrial facilities.

100% RECYCLED RUBBER SPEED HUMPS AND CUSHIONS

Benefits of using recycled rubber Speed Cushions include:

- Reduce speed, accidents and noise
- Quick and easy to install
- Minimal impact to buses and emergency vehicles
- Will suit any road
- Various widths allow for a tailored design
- Cost effective
- Cause minimal driver discomfort
- Durable and built to last
- Cost effective alternative to asphalt or concrete
- Highly visible
- Installed in minutes – no OH&S issues
- Ready for immediate use

SPECIALTY CARPARK PRODUCTS

WHEELSTOPS

WHY ARE WHEELSTOPS NEEDED?

To create a barrier for cars moving too far forward when parking and to protect property from damage whilst vehicles are being parked, in any type of car parking situation.

PREMIUM RUBBER WHEELSTOPS

- Solid rubber ensures no damage to cars
- Modern and effective
- Will not crack
- Safe for motorists and pedestrians
- Manufactured from recycled rubber
- Highly visible yellow and black marking
- Installed in minutes - no OH&S issues
- Ready for immediate use
- Cost effective alternative to asphalt or concrete
- Australian Standards Approved
- 4-hole anchor system will not dislodge
- 100mm depth inground chemset anchoring system

BOLLARDS

- Supply and installation of all types of in-ground and surface mount bollards available
- Bollards can be used as a ram raid obstacle
- Café and pedestrian protection
- Powder coated or galvanised to suit your specific job and site
- Lockable and removable available
- Reflective banding upon request
- Various dimensions for site specific install

CONCRETE WHEELSTOPS

- Natural or reflectively painted to suit your individual requirements
- Cost-effective solution for a carpark

D2E also paint existing concrete wheelstops to refresh an existing carpark with a reflective finish, saving time and money.

CORNER GUARDS

BIKE / TROLLEY BAY RAILS

- Custom made to suit location
- Repairs available to remove damaged rails and make safe for shoppers

NOTICEBOARDS

- Custom item to suit your individual shopping centre requirements
- Measured and manufactured to suit / mounted and painted if required
- Aesthetically pleasing to the community

ROAD SAFETY

RUBBER BARRIER KERBING

- Will not crack, chip or break away
- Easy and securely installed
- Cost effective
- Allows you to quickly and safely remove damaged kerb and have new kerbing ready immediately for vehicles and trucks
- Rough resistance for large vehicles

GUIDEPOSTS

Supply and install steel and PVC guideposts

- Strong and sturdy to withhold multiple impacts
- Reflective delineators for traffic visibility
- Many variations available
- Galvanised (powdercoated) available

SEPARATION AND SEMI BARRIER KERBING

Separation kerb is designed to direct or separate traffic while being flexible and low maintenance.

A fast and efficient system that is removable and able to be curved and angled to suit specific road or carpark environments. Reflective paddles assist with visibility by directing vehicles through any area and the solid holding anchor system is perfect for semi-permanent environments and short-term works.

RAISED THRESHOLD

We can mark your existing or newly asphalted raised thresholds as pedestrian, hatching or angled reflective lines. We will paint or utilise longlife thermoplastic material available where requested.

PEDESTRIAN SAFETY

The below products help prevent injuries in public places. These assist you to be proactive and not reactive to accidents, trips and falls.

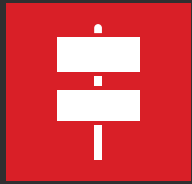

This can include trip hazard identification and highlighting.

TACTILES

STAIR NOISING

HANDRAILS

SUPPLY AND INSTALL SIGNAGE

ROAD SIGNAGE, CARPARK SIGNAGE, CUSTOM

D2E has a long-standing reputation for high quality, great service and competitive pricing for Traffic, Safety and Custom Signage.

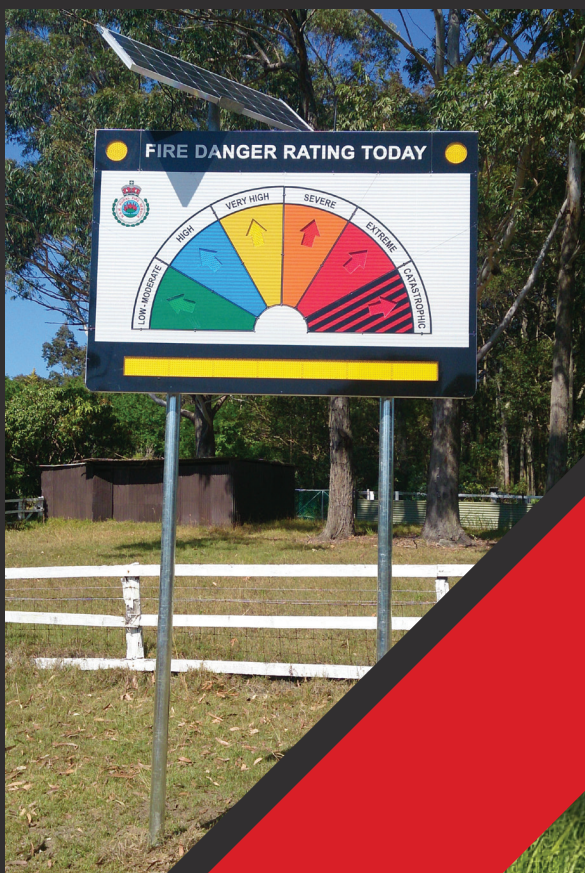

Our installation and maintenance team can handle all types of installations, no matter how large or small.

D2E work with our customers from the initial quoting stage to ensure a comprehensive and accurate quote that is based on the information available. Site visits can be arranged to gain further details prior to quoting, supply or installation.

We understand the pressure of completing projects on time and aim to complete the signage requirements as quickly as required.

D2E supplies temporary and permanent Australian safety signs suitable for any work site or business. Our most popular products include stop signs, safety and danger signs, pedestrian warning signage, site signage, and custom street blades.

D2E has a continuous focus on customer satisfaction by delivering a high-quality product range, reliable and fast supply, value for money pricing and exceptional customer service.
