

Avulux® Migraine & Light Sensitivity Lenses

What is Migraine?

Migraine is a genetic, neurological disease that affects 14.7% of people and nearly 48 million people in the United States.

Migraine impacts women 3x more than men.

90%

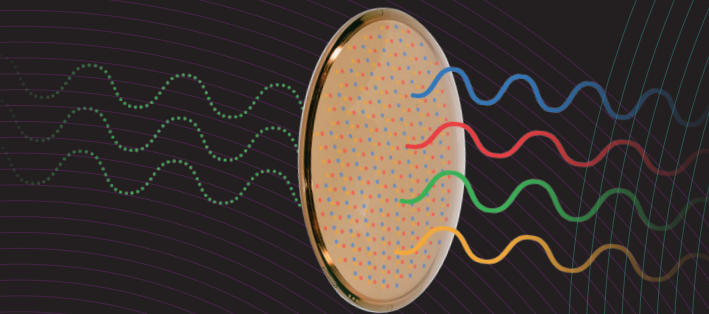

of people with migraine experience light sensitivity during a migraine attack

40%

of people with migraine experience light sensitivity between attacks (constantly)

30-60%

of migraine attacks are triggered by light or glare

The Avulux Lens

The Avulux® lens is the world's first clinically proven lens for people with migraine and light sensitivity. Avulux Real world experience shows that 90 percent of Avulux users find they can continue with their daily activities.
