CEO Gregory Mohammed
Neve Technologies Inc

Dear Mr. Mohammed,

I am pleased to write a letter of support for the development of the water bowl technology that you have been developing over the past two years.

If the product is field tested and works, is competitively priced, and is app controlled then Canarm will work with you to get it into the market place, using our sales and distribution channels.

In conclusion, we fully support the efforts of Neve Technologies Inc as they seek funding to support the development of this product. This will only help us to grow and move closer to a more innovative water solution for livestock.

Sincerely,

Paul Fallis
Vice President Canadian Ag
