| ABB                      | EV High Power Charging Cabinet               | HP 175      | EV High Power Charging Post - Terra HP family has ultra-high current charging capability and can charge both 400 V and 800 V cars at full power. With 375 A output, a single power cabinet can charge a 400 V car at full 150 kW continuously. For more information contact gsasupport@fedharmony.com, 703-624-1206.  | \$ 152,268.38     |
| ABB                      | High Power Charger Dispenser                 | HPCD1       | 200 to 950 Max DC Voltage, Measures 22"W x 15"D x 97"H (600 lbs.), Requires HPCT Power Cabinet, Payment types: CC, RFID (Ocpp Network Enabled), SAE Combo CCS1 and CHAdeMO, Level 3 DC Fast Chargers bypass slower on-board chargers providing DC power directly to the battery, greatly increasing the charging speed. DC fast charging is essential for high mileage/long-distance driving and fleets. The quick turnaround enables drivers to recharge quickly versus many hours from an AC Level 2 charger. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com   | \$ 52,437.21      |
| ABB                      | Heavy Vehicle Charging Station               | HVC 150     | HVC Depot charging systems are specifically designed to charge larger fleets of electric vehicles. Sequential Charging allows the connection of up to three depot charge boxes with a single power cabinet and vehicles are charged sequentially over time. Power range of 100 kW or 150 kW, Voltage range from 150-850 VDC, Small infrastructure footprint at vehicle interface, Flexible design for roof and floor mounting, Sequential charging for up to 3 outlets with 100 and 150 kW. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com                       | \$ 197,786.76     |
| ABB                      | EV DC Fast Charging Station                  | TERRA 124   | Terra DC Fast charger Maximum output power one EV up to 120 kW or two EVs each up to 60 kW are designed for the most compact, reliable and future-proof demands. In addition to a range of power selections, Terra chargers can be configured with CCS and CHAdeMO connector cables, in single or dual outlet format. Cable management, payment enablement and connectivity choices also offer owners, operators and site hosts options tailored to the needs of every charging site, from public to fleet needs. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com | \$ 108,371.71     |

| AMS Aircraft Recovery    | Turntable - 26 TON                        | 10060-219   | Turntable - 26-ton capacity, Custom built, cost-effective & robust design, little or no maintenance, 2.0 x 1.8m Platform, Low insertion height under the aircraft, Designed for use with airbag as an interface, Transportable in standard ISO shipping containers, The airbags will form to the fuselage shape, prevents secondary damage during aircraft movement, Precision engineered bearings for rotation, Securing positions for webbing straps, Manufacture by a company with 25 years in the Aircraft Recovery System industry, Adaptable to multiple aircraft types. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com | \$ 34,200.00      |
| AMS Aircraft Recovery    | Aircraft De-Bogging Kit - 25tonne, Single | 10060-234   | De-Bogging Kit - 25tonne, Single - 1730-99-027-6752 Simple and highly effective kit, proven in demanding circumstances, Fast deployment to recover aircraft quickly and safely, high-quality slings, shackles & load cells, Synthetic round slings with protective sheaving, Radio link load cell indicators to record and control the load applied ARM/ARD from airframe OEM advises that all loads applied to an aircraft during the recovery operation should be recorded. Essential to aid in Crash Damaged Disabled Aircraft Recovery (CDDAR). For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com                            | \$ 17,940.00      |
| AMS Aircraft Recovery    | Fighter Recovery Transporter              | 60211-1000  | The AMS Fighter Recovery Transporter is a self-contained tool designed to safely and rapidly respond to a variety of recovery incidents involving light aircraft, including advanced fighters. The Transporter can be towed to the incident site at up to 15 mph, or rapidly transported on a pallet. It is designed for both hard surfaces, and soft and uneven surfaces, and both Nose Landing Gear and Main Landing Gear failures. Self-Contained: No Crane Required. For additional information contact Global Support at (202) 779-0225 or email GSASupport@fedharmony.com  | \$ 362,500.00     |
| AMS Aircraft Recovery    | 3.5Ton Airlift Bag (Supplemental)         | 60211-1110  | 3.5-Ton Supplemental Air Bag for use with Aircraft with limited clearance such as the F-16 configured without underwing tanks. For additional information contact Global Support at (202) 792-7050 or email GSASupport@fedharmony.com.   | \$ 13,687.50      |
| AMS Aircraft Recovery    | 15 Ton Aircraft Lifting Air bags          | 9314-010    | Aircraft Lifting Air Bags - NSN: 5120-01-284-2611YZ. Aircraft Lift Bag System for the recovery of crash damaged or disabled aircraft (CDDAR). Unmatched stability and safety are achieved through the use of independent modules composed of three elements each. Low operating pressure prevents the risk of secondary damage. Multiple units can be stacked, up to five-high, as needed. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com   | \$ 97,170.00      |

| Behnke Enterprises Inc.  | 20K Low Profile Dump Trailer                       | LPD20        | The 20K dump series comes with newly improved design features and expands upon the current option offerings of the low-profile dump series. The chassis is riding on (2) Dexter 10,000-lb general-duty axles with oil bath hubs and 235/75R-17.5? super-single 18-ply tires. Loading equipment and materials into the dump box remains a breeze mainly because of a 29? deck height and 83? inside box width. This provides a key advantage for loading equipment, over traditional 20K capacity dump trailers that are often deckover style, which in turn have a taller deck height. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com | \$ 38,229.85      |

| Combilift USA            | 8 Ton Multidirectional Lift Truck | C8000       | Designed to improve your workflow by effectively becoming three forklifts in one, a sideloader, counterbalance and narrow aisle forklift. This revolutionary design eliminates costly double handling of material and improves productivity.The Combi C-series has the ability to quickly change the direction of its wheels and move in any direction. This 4-way movement gives this forklift the versatility to transport long loads through narrow doorways and around objects with confidence and utmost safety lift. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com  | \$ 102,842.85     |
| Combilift USA            | 6 Ton Multidirectional Lift Truck | CB6000      | The diminutive stature combined with the forklifts maneuverability makes the Combi-CB the perfect all-round forklift having the ability to transport a very diverse range of goods, from palletised loads to long length materials such as timber or steel beams. Its low profile and compact design enable the CB to offload HGV's and bring goods to racking or to feed production lines. The combi-CB is also small enough to enter containers for stuffing or de-stuffing. A further advantage of the CB's innovative 4-way steering and compact design is that it provides you with the versatility to operate it as a narrow aisle forklift. | Curbtender               | Rear Loading Refuse Truck | Quantum     | Rear Loading Refuse Truck - Up to 10 cubic yrd Hopper, unique packing mechanism utilizes a ?swing panel? instead of a ?slide panel.? This key design change allows the packer to clear more trash in a shorter amount of time and with a smaller hopper requirement. The net result is a faster, lighter rear loader with industry leading legal payload. hopper is also wide enough to receive commercial rear load containers without the use of a ?flared hopper? modification. Lastly, the Quantum is rated for high compaction. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com  | \$ 164,516.40     |

| FAE Advanced Shredding T  | Soil Stabilizer / Rotary Mixer              | STABI       | FAE's Soil Stabilizer/Rotary Mixer can be used across multiple applications including vegetation management, land clearing, and maintenance of river banks.For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com Fedharmony project management and.  | \$ 274,819.46     |
| FAE Advanced Shredding T  | Stone Crusher-Fixed Tooth Rotor             | STCL        | The FAE Stone Crusher is extremely versatile thanks to it small dimension and lower weight. This makes it suitable for use in orchards and vineyards where stones can emerge due to soil erosion. An adjustable internal counter-blade allows you to obtain the desired final material size. The hydraulically controlled rear door also helps in determining final product size. This attachment also has a specially mounted gearbox so while it sits in a low position, the PTO shaft still sits at an optimal angle. | Fedharmony               | LPTA – 100CY Mobile Processing Facility   | 275 MCBP        | The 100CY mobile concrete processing facility, available with 2, 3 or 4 aggregate bins, is totally self-contained. It needs no outside power source. The plant is self-erecting; eliminating the need for cranes, a substantial savings in set-up costs. Speed and ease of set-up and tear-down are a plus. The entire plant is compact and has a small footprint when set-up. The batch plant pulls in as one unit and is sold as a complete, operating batch plant. Everything needed to set up and batch concrete is standard equipment. No outside power source other than a 10 amp 120VAC power source to run the control system. Not necessary to have a concrete or steel foundation. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com | \$ 1,541,177.06   |

| Hogg and Davis Inc.      | High Production Cable Reel Trailer  | HP6500      | The industry's requirement for a high-speed overhead stringer with a brute strength underground puller is now answered with the HP6500 Hydrastatic Puller. The concept of the single-reel, self-maneuverable cable reel unit has been proven time and time again over the past several years. Now the HP6500 adds the additional speed and power required for the most difficult jobs. Its unique power train features a diesel, 4 cylinder, water-cooled engine and provides ?feather touch? electro-hydraulic proportional controls. | Hogg and Davis Inc.      | Four Drum Puller                    | ODP20-4     | The ODP 20-4 is a four drum puller capable of line pull of 2,000 lbs on a single drum. Each drum can be engaged or disengaged for single or multiple drum pulling. An overspin brake with a hydraulic brake caliper is also included on each drum. The automatic diamond lead screw levelwind allows for even winding of rope on one drum at a time. Optional dual levelwind available. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com   | \$ 217,621.80     |
| Hogg and Davis Inc.      | Single Drum Puller                  | ODP40       | The ODP 40 is a single drum puller capable of line pull up to 4,000 lbs. Disengaging the drive system allows for free wheel payout of the pulling rope with an integrated hydraulically controlled overspin brake. The operator controlled post style levelwind allows for even winding of rope. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com  | \$ 228,450.00     |
| Hogg and Davis Inc.      | Four Drum Cable Puller-Tensioner    | ODP40-4 HRC | The ODP 40-4 HRC (High Rope Content) is a four drum puller capable of line pull of 4,000 lbs on a single drum. Each drum can be engaged or disengaged for single or multiple drum pulling. An overspin brake with a hydraulic actuator is also included on each drum. Operator controlled post style levelwind allows for even winding of rope.All unit functions are centrally located at the operators station. Engine gauges including tachometer, oil pressure, temp, fuel, and voltage are all in view. Pulling is controlled with an electric over hydraulic friction joystick allowing for infinite control of line speed and presettable line pull. | Kato / IHI                  | Heavy-duty Carrier with Pivoting Dump | S25A         | Heavy-duty Carrier with 180° Pivoting Dump Box is designed for excellent performance and precise maneuverability in extreme conditions. The 46 HP Kubota Diesel engine hauls up to 5,510 lbs of load and climbs grades up to 25° with ease. A hydraulically operated 180° swivel dump simplifies the loading and unloading of material even on what seems like impassable, narrow terrain, while the 90° dumping angle ensures an efficient unloading process. A heavy duty rubber track undercarriage and chassis reduce impact on the ground with balanced weight distribution. Four see-saw type rollers maintain a comfortable, even ride even in difficult terrain as well as help absorb shock to the undercarriage and keep maintenance costs down. For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com | \$ 82,409.11      |

|--------------------------|--------------------|----------------|---|-------------------|
| MPH Industries Inc       | Dash Mounted Radar | BEE3-2KA-GS    | Dash Mounted Radar - The ergonomic design of the remote control ensures comfort, even after hours of use, Automatic Same Direction (ASD) makes same direction operation simple and removes potential judgment errors, Each major control function has its own uniquely-contoured switch, so the operator never needs to take his eyes off the road to look at the controls, BEE III is the most compact radar available. It has the smallest detachable display while retaining large multi-colored speed windows. The display and antenna can mount anywhere in any patrol vehicle, All minor functions are controlled using unobtrusive, secondary switches on the remote. The BEE III decides whether the target is approaching or receding with 100% accuracy. For additional information contact Global Support at (202) 779-0225 or e-mail <a href="mailto:gsasupport@fedharmony.com">gsasupport@fedharmony.com</a> | \$ 4,371.56       |
| MPH Industries Inc       | Speed Sign         | CROSSGDBAT-GSA | Speed Sign - Speed Guardian is a speed display with internal radar, which can be deployed in a number of situations. The sign can be mounted to a pole, and there are also versions mounted to a rolling chassis and for temporary mounting to a vehicle. Please visit our website at <a href="http://www.mphindustries.com">www.mphindustries.com</a> or contact us for additional information as to how Speed Guardian can be used to control vehicle speeds in your area. | Niftylift                 | Self Drive Work Platform          | Niftylift SD50 | The SD50 work platform combines the best of our self-propelled and trailer mounted ranges. It offers the same impressive reach capabilities as the TM50 but with the versatility of a robust yet very lightweight drivable base. This allows the user to maneuver, set up and operate the SD50 work platform without leaving the platform, especially on uneven surfaces. Rough terrain tires and 4WD as standard allow the SD50 work platform to maneuver easily over a wide range of site conditions and its outstanding reach makes it ideal for tree care or construction site work. | Vancer                   | Hi Rail Excavator-Light                             | CHX13       | Compact in design, the CHX13 hi-rail excavator features great strength and performance in a lighter-weight machine. It provides operators the performance and power needed to complete rail maintenance projects in short windows. The advanced hydraulic system of the compact CHX13 allows the operator to work on and off track ? but delivers performance that is unmatched for its size For additional information contact Global Support at (202) 779-0225 or e-mail gsasupport@fedharmony.com  | \$ 898,394.39     |
| Vancer                   | Hi Rail Excavator-Medium                            | CHX25       | Hi Rail Excavator-Medium - The combination of compact size and rail capability makes the Vancer CHX25 Hi-Rail Excavator an excellent fit for any rail maintenance job. The C4.4 ACERT motor provides ample power while conserving fuel and minimizing DEF usage. In-cab controls for auxiliary and hi-rail equipment are engineered for ease of use, guaranteeing high productivity. Pneumatic components were added for train air brakes. Hi-rail drive allows the CHX25F Hi-Rail Excavator to easily make its way to water-logged, crowded or remote work locations. Using this machine will bring decreased downtime and increased productivity. | XL Specialized Trailers  | Gooseneck Trailer    | XL80 Series | Hydraulic Detachable Gooseneck Trailer - XL 80 Low-Profile HDG features an 11-foot long hydraulic gooseneck with XL's low-profile design. A five-position ratchet-style variable ride height allows users to adjust the neck height to fit their various loads. This new two axle construction lowboy is available in three options: a 44-foot, 6-inch overall length with 24 feet in the well, a 46-foot, 6-inch overall length with 26 feet in the well, or a 48-foot overall length with 27 feet, 6 inches in the well. The short gooseneck allows for the main deck to stay as long as possible, an important factor for many users who may need to fit a long load or multiple small pieces of equipment onto the main deck.
