Process Control DYNAMICS

Advantech

Intelligent industrial hardware solutions for a wide variety industrial markets including Oil & Gas, Water, Wastewater, Building Controls and more. Solutions include powerful edge computing IoT/IIoT devices, industrial PC's, network switches, cellular communications, industrial displays, and more.

Bedrock Automation

Cyber Secure industrial control system platform for mission critical and critical infrastructure applications in Oil & Gas, Water/Wastewater, Building Controls, and other high security sensitive systems. With intrinsic embedded cyber security down to the transistor level, Bedrock solutions provide not only the highest levels of security possible in a PLC/PAC/RTU and Flow Computer platforms, but also unparalleled flexibility, performance and the lowest life cycle cost on the market .

FlowWorx

The FlowWorx JT400 Multivariable Pressure Transmitter (MVT) was designed by industry experts to deliver the most capability at the lowest power. Packed with features and benefits like no other MVT, the JT400 offers digital I/O, external USB port and up to 12-year battery life with no recharging needed – all in an explosion-proof housing.

ICONICS (A Group Company of Mitsubishi Electric)

Industrial and commercial software solutions including advanced HMI/SCADA, Analytics, Mobile, and Business Visualization Enterprise Software Solutions including GENESIS64, IoTWorX, Hyper Historian and Mobile HMI brands.

GENESIS64™   IoTWorX™   Hyper Historian™   MobileHMI™   AnalytiX®

Kepware Technologies

Communications platform solution that provides connectivity to thousands of different industrial, IT and IoT devices to provide data to commercial and industrial software applications including MES, SCADA, IoT/IIoT, and everything in between. Kepware solutions allow users to connect, manage, monitor, troubleshoot, and control diverse automation devices and software applications through one intuitive user interface.

Mitsubishi Electric - Inverters/Variable Frequency Drives

With a comprehensive line-up of VFD/Inverter products include solutions from very simple fractional horsepower micro drives with flexibility for connectivity, to inverters delivering energy efficiency for fan and pump markets, Mitsubishi solutions offer unmatched precision and ease of integration to meet the most demanding applications.

OleumTech

Wireless M2M and monitoring solutions designed for Oil & Gas, Water/Waste and other industrial applications involving process monitoring, data acquisition and control systems. OleumTech products unite traditional control infrastructures with cutting-edge wireless technology, superior quality and unmatched reliability.

Ovarro Connecting Technologies

PLC / RTU and Industrial IoT/IIoT appliance solutions for Industrial Automation, Asset Management, Monitoring, Alarming, Data Logging and SCADA applications with TBox and Kingfisher RTU/PLC/PAC Solutions.

TBOX   KINGFISHER

XetaWave Technologies

XetaWave represents the next generation in Industrial RF Communications. Utilizing a Programmable Radio philosophy, XetaWave offers a unique combination of high speed performance and flexibility not typically found in other Industrial RF Solutions. Solutions include Unlicensed (900Mhz and 2.4 Ghz) and Licensed (400Mhz, 900 Mhz and more) radios.
