

ENTERPRISE OPERATIONAL ROADMAPPING

OVERVIEW

Having an effective operational roadmap provides organizations with a more holistic insight into their initiative spend envelope. Capturing proposed initiatives at the same altitude and with the same context gives a level of information that helps put the right initiatives on the roadmap, improves the probability of completing them, and helps protect the organization's investments.

WHO IS IT FOR?

Any organization that wants to:

- Create a more holistic and contextual view of their enterprise initiative plans and planning process
- Understand inter-connectivity and reliance between cross-departmental initiatives
- Mitigate spend and execution risk within their program portfolio

OBJECTIVES

- Create an objective operational roadmap across the organization
- Categorize and rate initiatives based on a specific set of criteria and definitions
- Document initiative plans in a consistent and contextually relevant manner
- Identify financial and executional risks across the organizations initiative portfolio

ESTIMATED EFFORT

Minimum Staffing for 6-9 weeks

- Lead Initiative Consultant
- Project Manager
- Business Architect

The effort depends on the size and complexity of the organization and breadth of the scope

BENEFITS

Enterprise Operational Roadmap benefits:

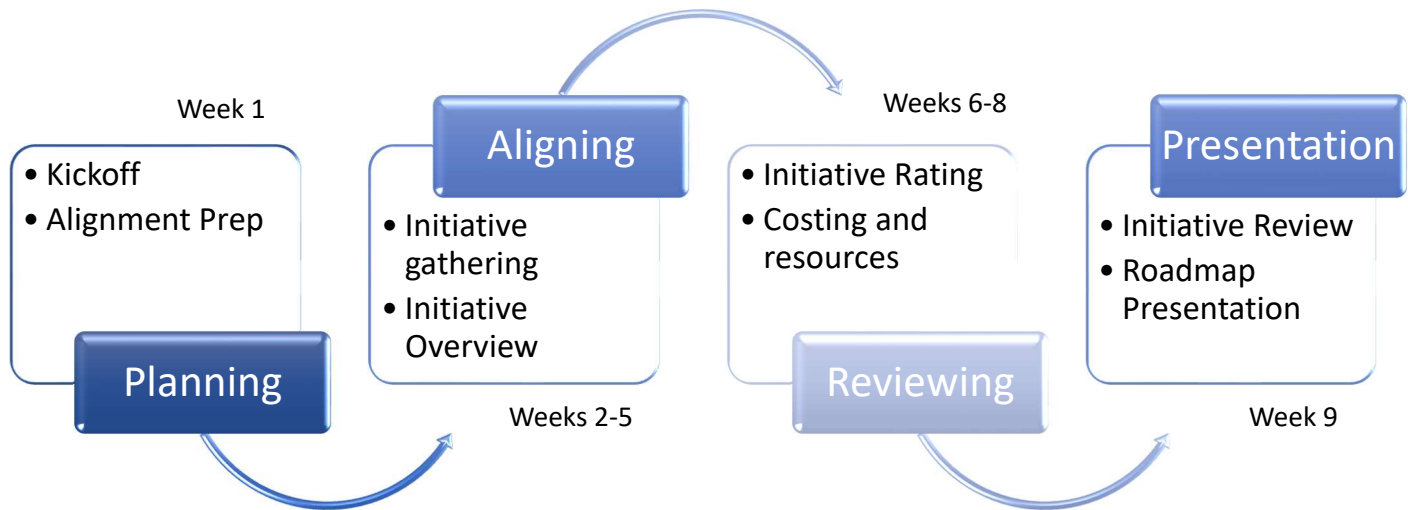

- Holistic overview that understands cross-functional impacts
- Creates a transparent view across business process, teams, and technology to enable cross functional planning and keeps initiative funding aligned with purpose and intent
- Enables cross functional collaboration, problem solving through a transparent and repeatable framework
- Creates a process centric view that provides ongoing context for improvements and additional initiatives
- Creates an impactful conversation around initiative funding and allows a way to refocus funding to make it about value business value instead of departmental or IT spend
-

KEY DELIVERABLES
