

# CYCLE SMART SCHOOL PROGRAM

*Engage, Educate and Empower Regional and Remote Schools in SA*

The Cycle Smart Program, provided by Bicycle SA, is an exciting and comprehensive initiative designed to engage students from all year levels in fun and educational bike sessions. Our program teaches students how to ride a bike safely in regional and remote communities.

- ✓ Increased school attendance
- ✓ Increased well-being and sense of belonging
- ✓ Enhanced confidence and skills
- ✓ Improved road safety awareness

## Program Highlights:

- **Tailored Bike Sessions:** Age-appropriate lessons that cater to all skill levels.
- **One-Week Program:** Intensive and immersive learning experience.
- **Big Bike Carnival:** An exhilarating event to conclude the week, celebrating students' achievements and newfound skills.

## Why Choose Cycle Smart School Program?

- **Safety Skills:** Equip students with essential bike skills and safety knowledge.
- **Personal Growth:** Encourage learning and self-challenge, increasing confidence in the future.
- **Exploration and Fun:** Empower students to explore the freedom that a bike can offer.

Join us in making biking a safe, enjoyable, and integral part of your students' lives. Let's work together to bring the Cycle Smart School Program to your school!

# AN IMPACT STORY

How a CYCLE SMART school program can  
impact your school and wider community

## LEIGH CREEK VISIT BOOSTS SCHOOL ATTENDANCE

Students at the Leigh Creek Area School saw the possibilities in Bikes Palya's four-day visit in April 2023 and grabbed them for all they were worth.

During that time, the youth either learned how to ride or improved their riding skills, developed road safety awareness and abilities, and boosted their bike handling and overall confidence. School attendance rates spiked, and student engagement was elevated all week. They engaged enthusiastically with the Bike instructors – who were supported by the school's teachers and support staff – and not only developed a better understanding of how to look after their bikes but also learned about great new ways to have fun in their community. The program increased the general school attendance significantly over the week the program was delivered.

Opportunity is a defining pillar of the Bike program. Teaching the students not only that learning and challenging themselves opens doors for their future but that, with a bike and the skills they learn from us, their own world right now becomes a bigger, more exciting and more fun place to explore and enjoy.

*Transforming the Future, One Ride at a Time*

REACH OUT TO US:

“

*We've had brilliant instructors. They have been beautiful with the children here in Leigh Creek. Examples: Showing them how to fix their bikes, road safety and of course how to have fun in their community. It has been a wonderful experience having them with us. Thank you, Bicycle SA, for coming up here.*

”
