

## Scott Aspect 730 27.5 Mountain Bike - Hardtail MTB

The Scott Aspect 730 is a hardtail mountain bike with confident handling and versatile 27.5" wheels.

Featuring performance MTB geometry for a stable and efficient ride the Aspect is ideal for cross country trail riding and leisure cycling. The 6061 aluminium frame is double butted. This means that excess material has been removed from low stress areas for a lighter frame while maintaining strength. 27.5" wheels give you the ideal balance between rapid rolling performance and nimble handling characteristics.

The Suntour XCR fork offers 100mm of suspension travel to smooth the trail and features adjustable rebound damping so you can fine tune the performance. A remote lockout lever allows you to ride more efficiently on smooth surfaces without taking your hands off the bars.

The Shimano Deore 3x9 speed drivetrain offers reliable shifting over a wide range of gears while the hydraulic disc brakes deliver confident all weather stopping power.
