

I will write my numbers

Around and around and
around you go,
When you get back, you've
made a zero

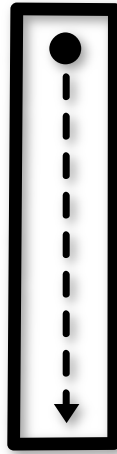

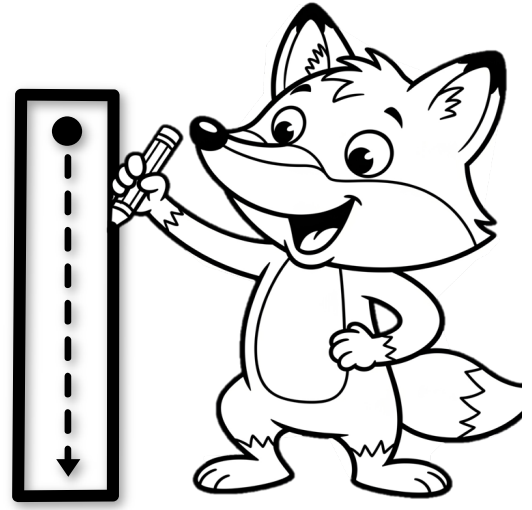

Zero

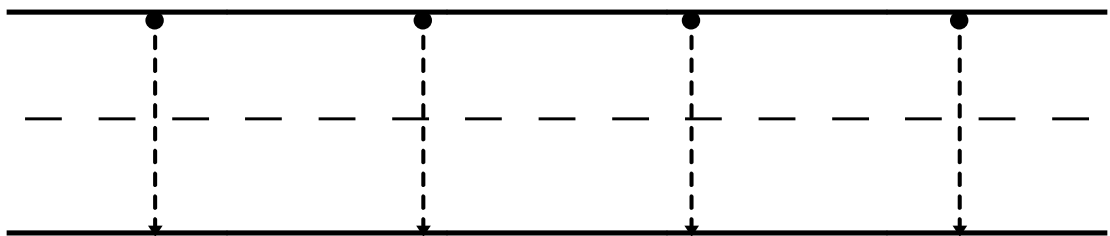

I will write my numbers

A straight line down,
Then you are done!
That's how you make
The number one

one

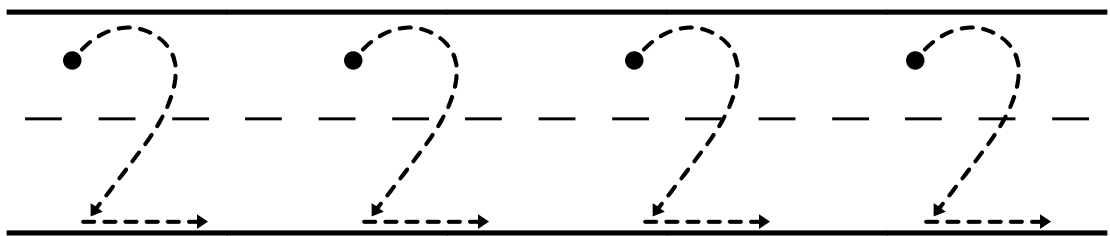

I will write my numbers

Go 'round and down,
Then straight across, you
see!

That's how you write
The number two for me

two

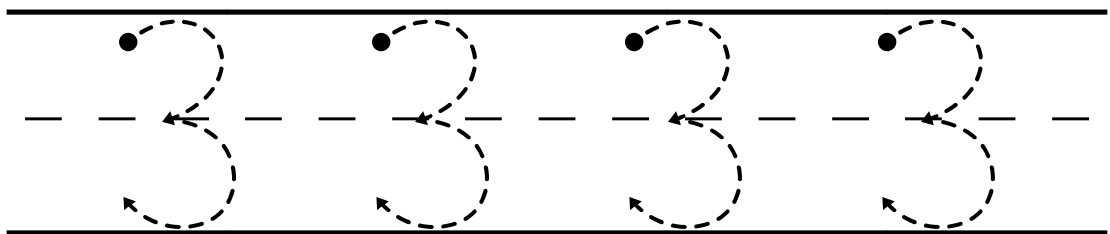

I will write my numbers

Around the tree,
And around the tree,
That's how you make
The number three

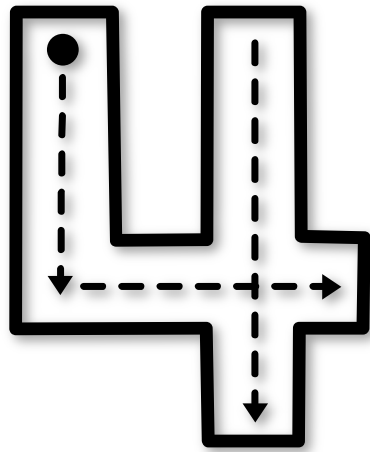

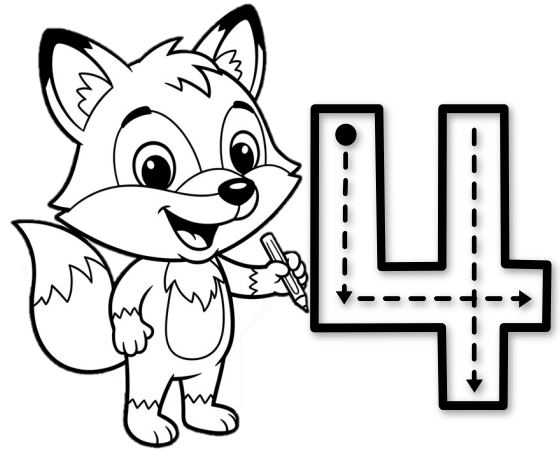

three

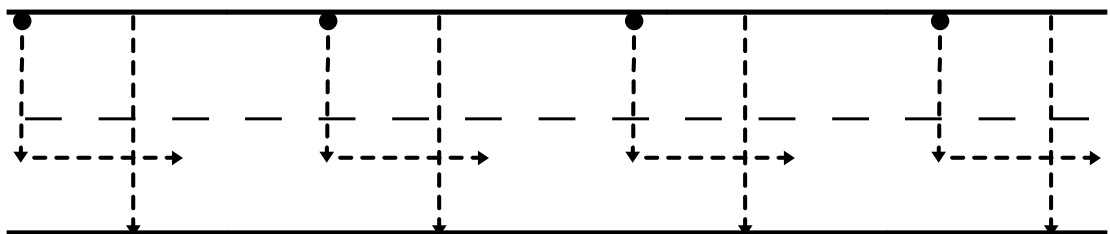

I will write my numbers

Down and over,
Then down once more,
That's how you make
The number four!

four

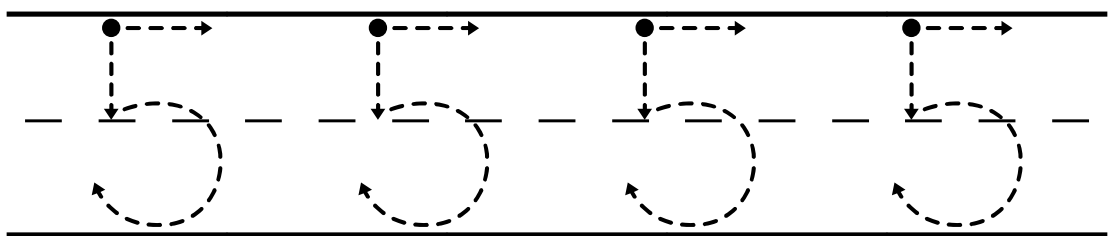

I will write my numbers

Down and around,
Then a hat on top,
That's how you make
The number five, don't stop

five

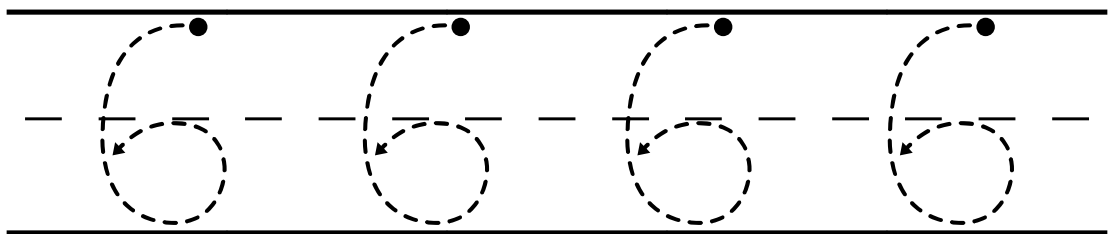

I will write my numbers

Down to a loop,
A circle you fix,
That's how you make
The number six

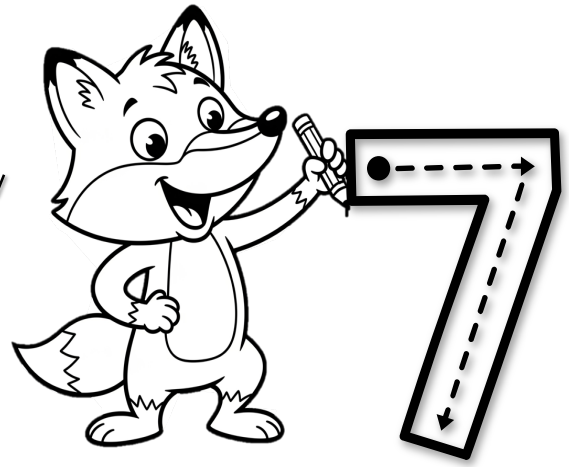

six

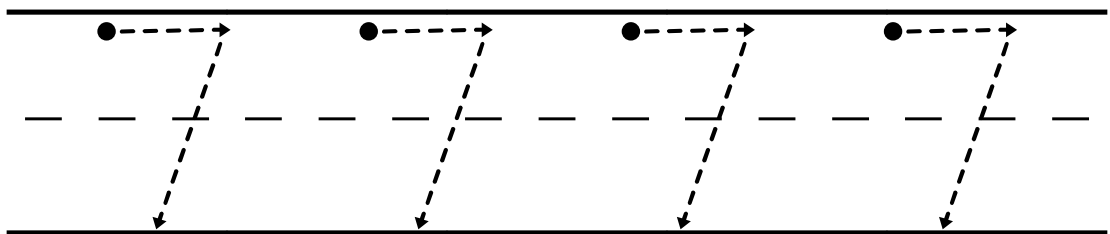

I will write my numbers

Across the sky,
Then down from heaven,
That's how you make
The number seven

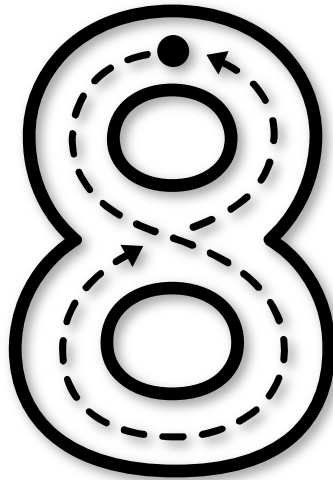

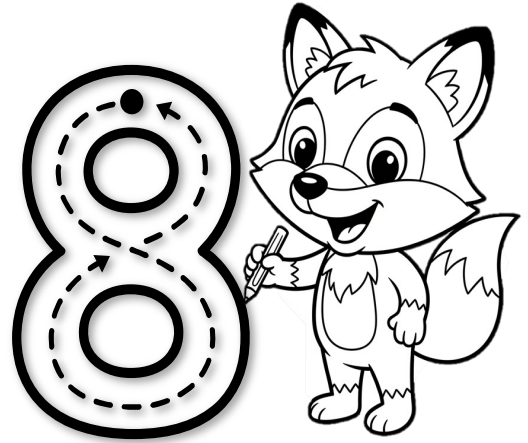

seven

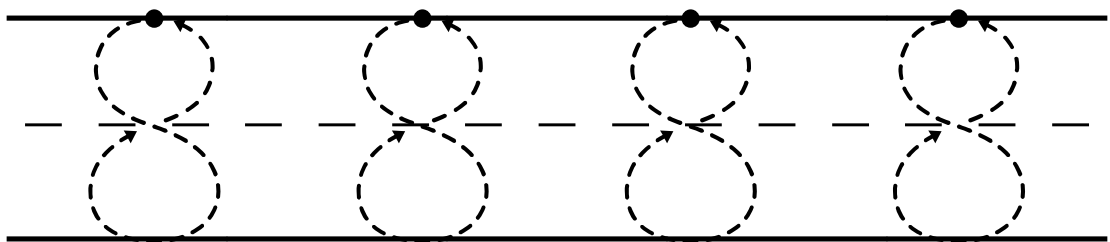

I will write my numbers

Make an 'S' and do not wait,
Go back up to close the gate
That's how you make
The number eight!

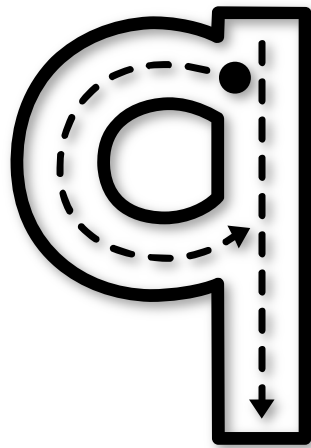

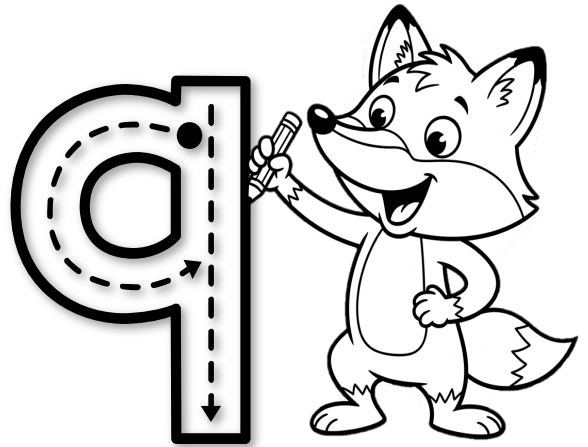

eight

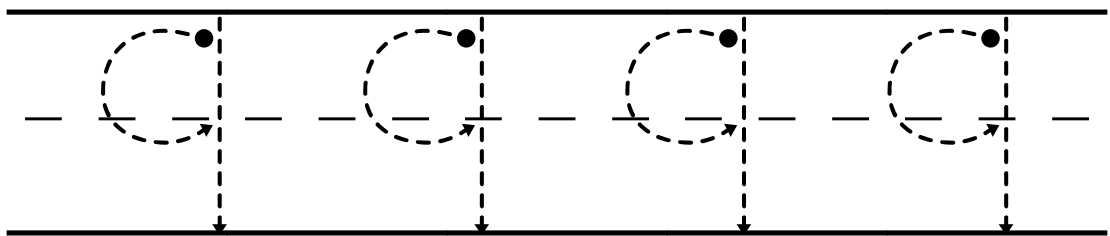

I will write my numbers

A circle and a line,
Looks just fine!
That's how you make
The number nine

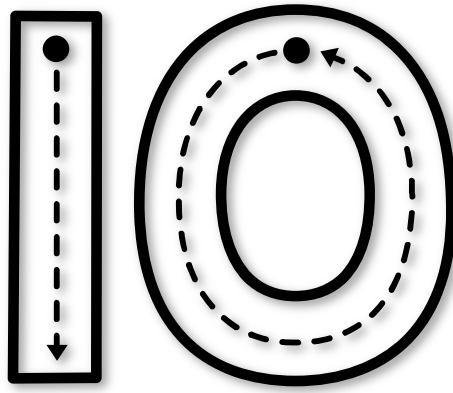

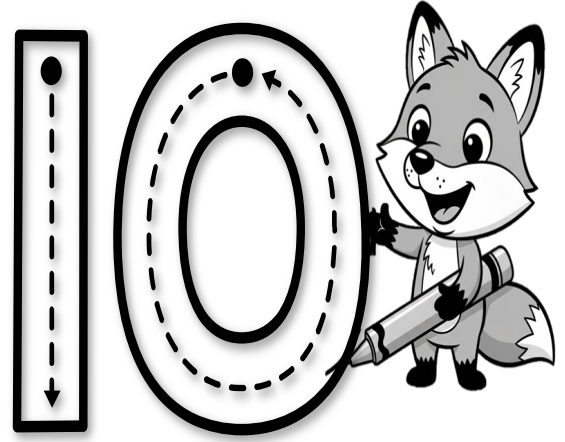

nine

I will write my numbers

"A straight line down,
Then a zero so round,
That's how you make
The number ten, on solid
ground

Ten
