Aluminum Fence

Aluminum fencing is a classic option that has graced properties for years and will continue to do so in the future. While many homeowners are drawn to its visual charm, decorative aluminum fencing provides much more than mere aesthetics. This fencing solution is durable, long lasting and versatile making it the perfect choice for almost anything. For example, the powder coating process our aluminum fence goes through is AAMA 2604-05 certified and is salt spray tested for double the time as our competitors. This reason, amongst others is why it's classified as "super durable" by the powder coating industry. With an extensive array of heights, thicknesses, and colors to choose from, the possibilities are truly limitless.
