

Elodene Baker

Highly creative and multitalented Digital Artist with 10+ years of experience in multimedia, production and computer aided design (CAD). Passionate and inventive creator, my creations are a mix of magical fantasy with a moody gritty undertone; I aim to tell a story with my Art and take people through an artistic journey. Since my early years, Art has been a deep rooted passion; I started working with pencil oils and charcoal. I also enjoy channelling my creativity into fashion; creating bespoke designs for a range of existing clients and fashion editorials, landing my first editorial cover at the age of 19. With the rapid digitalisation of the world, I also started learning and using CGI production as well as CAD in which artistic content for fashion, music and film were created. I'm Accustomed to performing in deadline-driven, fast paced environments with an emphasis on ensuring projects are completed within budget.
