A Conscious Leadership Immersion for School Leaders

About the Program

Conscious Leadership for Progressive Schools is a value-based leadership alignment program designed to support school leaders in discovering their core values, identifying their authentic leadership style, and realigning their leadership to lead consciously and sustainably.

This 4-hour immersion serves as the foundational phase of a larger Conscious Schools journey. It shifts attention from the wider ecosystem of the school to individual contributions, helping leaders see how their presence and decisions ripple across people, practices, and culture.
