401(k) Review

Brian and Sam Springberg, our financial partners for the 401(k) program, will visit each dealership and powersports location beginning the week of October 7. Flyers with the date and time have been posted at each location.

They will be available to discuss any changes you may want to make to your current information, help you set up the plan through Voya, or answer any questions you may have.

Flu Prevention

The 2026–2027 U.S. flu season begins in October, with activity typically ramping up in the fall and winter and peaking between December and February.

Timing and Vaccination

- When to get vaccinated: September and October are the ideal months to get your flu shot. Getting vaccinated by the end of October provides protection before viruses spread widely.
- New options: A new mRNA flu vaccine is available this season alongside traditional standard-dose, cell-based, and nasal spray options.

Common Symptoms

- Sudden fever or feeling feverish with chills.
- Cough, sore throat, and runny or stuffy nose.
- Muscle or body aches, headaches, and fatigue

Prevention Habits

- Wash your hands often with soap and water for at least 20 seconds.
- Avoid touching your eyes, nose, and mouth.
- Stay home if you feel sick to avoid spreading the virus to others.
- Be aware of who needs a vaccine in your household (such as young children or older adults)
