Cybersecurity Training Course

13, 14 & 15 March 2024
Bracknell - UK

The only ISA/IEC 62443 Training with Official Certification (*)

Assessing the Cybersecurity of New or Existing IACS Systems (IC33)

The first phase in the IACS Cybersecurity Lifecycle (defined in ISA 62443-1-1) is to identify and document IACS assets and perform a cybersecurity vulnerability and risk assessment in order to identify and understand the high-risk vulnerabilities that require mitigation. Per ISA 62443-2-1 these assessments need to be performed on both new (i.e. greenfield) and existing (i.e. brownfield) applications. Part of the assessment process involves developing a zone and conduit model of the system, identifying security level targets, and documenting the cybersecurity requirements into a cybersecurity requirements specification (CRS).

This course will provide students with the information and skills to assess the cybersecurity of a new or existing IACS and to develop a cybersecurity requirements specification that can be used to document the cybersecurity requirements the project.

Visit; ISA/IEC 62443 Cyber Security Expert Program - ISA-EMEA (isaeurope.com) for more information about becoming a cybersecurity expert.

DETAILS

Walk in: 13th March 2024 @ 08:30
Start: 13th March 2024 @ 09:00
End: 15th March 2024 @ 17:00
Organizer; ISA European Office
  ISA England Section

VENUE

Honeywell House,
Skimped Hill Lane,
Bracknell,
Berkshire, RG12 1EB- UK

Price :
Cost for ISA members: Training = € 2.195, Exam fee included
Cost for non-ISA members: Training = € 2.595, Exam fee included
ISA membership: € 130,
You can become ISA regular member on https://www.isa.org/membership/join-isa/

(*) *Candidates must successfully complete the course and pass the exam at a Scantron Center or online to receive their badge;* **ISA/IEC 62443 Cybersecurity Risk Assessment Specialist**
