**IWI**  
SK GROUP MEMBER

# 1

Lower leg

Check connection of units (7),(8) and (9) and adjust the straps on the lower leg. Make sure that the connection of the foot is fastened at the bottom of the shoe.

# 2

Upper leg

Put on the groin protector (6), make sure that the hip protector (11) is connected to the pelvic protection belt and put on the pelvic protector (10). Adjust the thigh protector straps on the thigh according to comfort.

# 3

Tactical Vest  
Arm protection

Make sure that the lower arm parts (13+14) are connected to the elbow. Make sure that the upper arm parts (3+4) are attached to the vest. Make sure that the lower abdomen protector (5) is attached to the vest. wear the vest (12). Adjust the straps on the arms.

# 4

Bag

An equipment bag contains all the equipment for the security guard. Inside 2 compartments - a large compartment for a suit + overalls. A small compartment for a mask and helmet. The bag has several external compartments: Baton, Ventilation compartment for helmet and mask after use. Personal name check box. Velcro strips for organization and unit marking.

# Safety & Maintenance

The outer cover is machine washable. 30 degrees without detergents.

The trauma protection can only be cleaned by hand with a wet towel.  
Ventilate in an open place before inserting into the cover.

VPAM KDIW  
W2 / W3

The body shield is a unique, flexible patent that meets the German VPAM2/3 standard.  
The VPAM standard is the strictest standard in the world for examining the trauma of beatings and injuries to the body.

Standard 2 - corresponding to the impact of stones on the body.

Standard 3 - equivalent to the impact of rocks on the body.

**Storage conditions:** ventilated place at a temperature between 10-30 Celsius.  
The equipment itself can work between (-20)C to 70C.

Level 2 – 6.4kg

Level 3 – 7.8kg

A lightweight system with a very high protection capacity.

**Versatile:** suit for all the operator needs:

Arrest and search mood, with preparedness for ballistic protection.

rapid riot control mood for immediate event.

Full riot control protection for known event.

**Flexible:** The suit protection consists of flexible compressed sponge & layer of HDPE and PP.  
The flexibility of the material allows for optimal attachment to the body that allow a wider range of motion in operation and make it suitability for both men and women.
