<i>1 year</i>	<i>Bordetella</i>	
	<i>Wormer/ Flea/Tick/ Heartworm Meds MONTHLY</i>	
<i>1 year</i>	<i>First Dental Exam/Cleaning</i>	

Every 3 years            *Parvo/Distemper boosters and Rabies Vaccines.*  
                                 *Rabies Vaccine, every 3 to 5 years. We vaccinate Annually for Rabies in our  
kennel*

#### *FLEA/TICK PREVENTION*

*If you live in the continental United States, you will need to begin preventative treatment against heartworm, fleas, mites and ticks on a MONTHLY basis. "Revolution" RX can be used on puppies as young as 6 weeks of age. It is a topical placed at the scruff of the neck each month and from personal experience is highly effective.*
