Differentiators

- Over 20 years in Program and Project Management controlling capacity planning, predictive forecasting, and mitigating risk resulting in increased accuracy in workload balancing, faster decision-making, and 20% improved project outcomes.
- Developed a strategic business model based on real world experience and technology training leading to 100% success rate of clients getting into college and 95% obtaining employment.
- Created reinforcement action plans and clear road maps for clients to be sustainable after leaving the program.
- Established implementation procedures and structured staffing models
- Centralized oversight and reporting practices using Artificial Intelligence to automate repetitious tasks allowing employees to structure work/life balance.

Past Performance

Key personnel have past experience with:

Tampa Bay Technical High School: The marching band earned the program's first-ever Superior rating — the highest distinction at state competition; 4 students gained acceptance to Florida A&M University through targeted academic and admissions support

AMIKids-Gadsden: (at-risk youth, ages 11–17): 92% of program participants had clear education or career plans in the first-year post-high school; 90% program completion rate; all students obtained a basic coding certification

McKesson Healthcare: Implemented an enterprise Zero Trust Remote Access platform to support a new Zscaler platform and create McKesson's Artificial Intelligence/Machine Learning (AI/ML) Operations.

Keiser University: Implemented and redesigned Information Technology course curriculums in Introduction to Computers, Database Management Systems, Information Security Management, and Security Infrastructure Management. 95% course pass rate, with four graduating students securing employment within the Information Technology field. End-of-course student feedback reflected in a 94% satisfaction rate and strong student retention demand.

Renee Alliance Group LLC has past experience with:

GA Department of Community Supervision: 20% reduction in recidivism within the first year of program implementation; 95% of participants achieved employment success
