

# PICKING UP YOUR NEW CAMPER

What is needed to tow your new trailer:

- A 2" ball connected to your tow vehicle is required to tow the trailer. The ball should measure 16" from ground level to the top of the ball (See photo 1). Visit [xyzcamping.com/store](http://xyzcamping.com/store) to view 2" balls, pins and ball mount hitches for sale.
- A 4-pin electrical flat connector for brake lights, turn signal lights and marker lights is required pre-installed on your tow vehicle to tow the vehicle legally (See photo 2).
- A 2" ball coupler pin (Size is 1/4" diameter) is required when picking the trailer up at our sales lot in Pennsylvania. You can bring your own 2" ball coupler pin from home (Size is 1/4" diameter) or you can purchase a 2" Ball coupler brass lock with key (see photo 3) for \$10 from XYZ Camping, LLC which also acts as a deterrent for theft. View the brass lock with key at [xyzcamping.com/store](http://xyzcamping.com/store)
- XYZ Camping, LLC does not install hitch receivers or 4-pin electrical flat connectors to your vehicle. Contact your local mechanic or [uhaul.com/Trailer-Hitches/](http://uhaul.com/Trailer-Hitches/)
- XYZ Camping, LLC can assist with installing new ball mount hitches, 2" balls and pins purchased from the XYZ Camping store. This purchase from XYZ Camping guarantees a 16" ball height.
- XYZ Camping, LLC can NOT assist with customer owned ball mount hitches, 2" balls and pins because of our insurance policy.
