

AVTA Trail conditions Fall 2020 -

The trails get deep very fast with rain like we have had. When things dry out, stay in areas that you know will be ok. Ride with the utmost discretion. We are counting on your common sense.

Please stay where it is high and dry. Ride on farm roads and places that will not be compromised.

The trails around Greeks including county lands have a high water table and should not be ridden on till they dry (most likely late spring).

The trail that parallels Buxton's pasture has trail closed signs and should not be ridden on till the signs come down.

The trail through Ronnie Deceasre's is closed because of mud and will reopen when it dries.

Please check the website for trail closures. Any signs posted supersede the website information.

Any concerns, please contact Gail Cahill. gailcahill01@gmail.com

Happy Trails!
