Surgical Sutures

Polyamide Non Absorbable

10-0

Sterile Surgical Suture with Needle

Description	Polyamide Non Absorbable Surgical Suture With Needle
USP	10-0
Total Length	38cm
Needle Size and Specification	3/8 Circle Micropoint Spatulated 6mm Double Needle

Polyamide Non Absorbable

6-0

Sterile Surgical Suture with Needle

Description	Polyamide Non Absorbable Surgical Suture With Needle
USP	6-0
Total Length	70cm
Needle Size and Specification	3/8 Circle Reverse Cutting 10mm

Polyglycolic Acid Absorbable

8-0

Sterile Surgical Suture with Needle

Description	Polyglycolic Acid Absorbable Surgical Suture With Needle
USP	8-0
Total Length	30cm
Needle Size and Specification	3/8 Circle Micropoint Spatulated 6mm Double Needle

Polyglycolic Acid Absorbable

6-0

Sterile Surgical Suture with Needle

Description	Polyglycolic Acid Absorbable Surgical Suture With Needle
USP	6-0
Total Length	45cm
Needle Size and Specification	1/4 Circle Micropoint Spatulated 8mm Double Needle

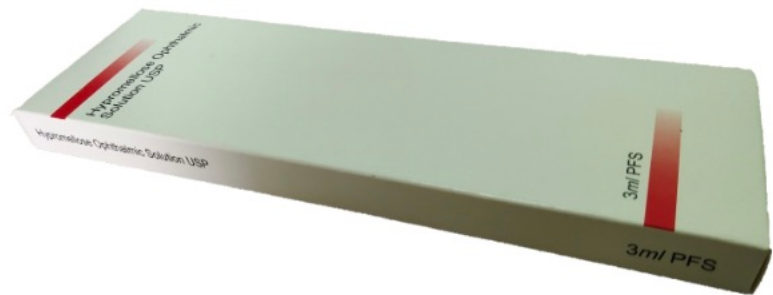

Polyglycolic Acid Absorbable

5-0

Sterile Surgical Suture with Needle

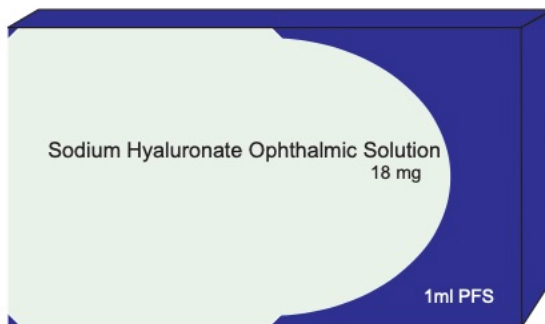

Description	Polyglycolic Acid Absorbable Surgical Suture With Needle
USP	5-0
Total Length	45cm
Needle Size and Specification	3/8 Circle Reverse Cutting 12mm

Ophthalmic Solutions

Description

- * Hydroxypropyl Methylcellulose Ophthalmic Solution 2% w/v
- * HPMC Solution with a high molecular weight greater than 80000 daltons for Intraocular use during the Surgery of the anterior segment of the eye.
- * Viscosity of the solution is 4000 to 5500 cps.
- * Packaging Size: 5 ml Vial, 2 ml PFS & 3ml PFS.

Description

- * Premium Injection grade quality Sodium Hyaluronate material.
- * High Viscosity (100000 - 150000 m.pas at 25°C) & high Molecular weight(>2.8 million dalton)
- * Increased protection to Corneal Endothelium and Ocular tissues.
- * Synthetic fermentation - no risk of viral infections.
- * Packaging Size: 1ml PFS

Description

- * Carbachol Intraocular Solution 0.01% w/v
- * Indicated for staining of ocular tissues during capsulorhexis and retinal surgery.
- * Reduce the intensity of Intraocular pressure elevation in the first 24 hours after cataract surgery.
- * Packaging Size: 1ml vial and 1ml PFS

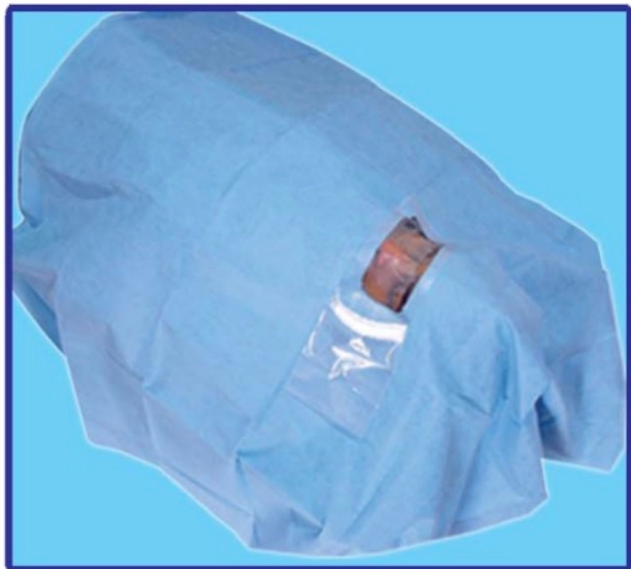

Description

- * Trypan Blue Ophthalmic Solution 0.06% w/v
- * Indicated for staining of ocular tissues during capsulorhexis and retinal surgery.
- * Reduce risk of Complications due to inadequate visualization of the membranes.
- * Packaging Size: 1ml vial and 1ml PFS
