

## Making Manual Therapy Easy

The WellBox is a hand-held device with 2 rollers and a vacuum, providing manual therapy to the skin and underlying subcutaneous tissue that is additionally consistent and efficient. This device is painless and non-invasive.

Originally invented in 1986, there is now evidence with regards to the treatment of

- burns
- oedema
- lymphoedema
- cellulite
- sports injuries
- neuromuscular disorders.

The Wellbox is a registered Assistive Technology device with Perth Integrated Health as the re-seller and is used successfully with Assistive Technology Applications by Occupational Therapists for patients
