

# JOY CLIMBERS EXPEDITION

## **2-Day Lake Manyara & Ngorongoro Crater**

This safari package is designed to offer visitors with a time constraint, a short but very intense Tanzanian Northern Circuit Wildlife Safari.

### **Day 1**

#### **Arusha – Lake Manyara**

**Distance: 203 km**

Meet our professional tours guide/driver in Arusha town, who will deliver a short safari info briefing, after which, we travel to the Lake Manyara National Park. We arrive in time for lunch at the lodge. After lunch we head into the Lake Manyara National Park. This impressive park is one of Tanzania's most dramatically located wildlife areas, consisting of a massive but shallow soda lake (covering two-thirds of the park) at the foot of the Great Rift Valley's western escarpment. The park's varied habitat attracts a wide variety of animals, including one of Africa's largest concentrations of elephants, Manyara's famous tree-climbing lions, as well as large flocks of flamingos attracted by the algae in the lake.

### **Day 2**

#### **Lake Manyara National Park – Ngorongoro Crater**

**Distance: 60km & 273 km**

After breakfast we descend 600m into this magnificent crater for a morning, half-day game drive. The Ngorongoro Crater is one of the most densely crowded African wildlife areas in the world and is home to an estimated 30,000 animals including some of Tanzania's last remaining black rhino. Supported by a year round water supply and fodder, the Ngorongoro National Park supports a vast variety of animals, which include herds of wildebeest, zebra, buffalo, eland, warthog, hippo, and giant African elephants. Another big draw card to this picturesque national park is the dense population of predators, which include lions, hyenas, jackals, cheetahs and the ever-elusive leopard, which sometimes requires a trained eye to spot.

We will enjoy a picnic lunch in the crater, after which we travel back to Arusha or Airport where we will end our African safari adventure.
